Calls for proposals vs calls for tenders

What are calls for proposals?

With calls for proposals the Commission selects, on a competitive basis, organisations or natural persons to implement projects co- financed by EU because these projects contribute to EU policy aims.

In a nutshell:

- Advance payments allowed
- Reimbursement for real costs
- Deliverable is a report or completion of project

See all calls for proposals >

What are calls for tenders?

With calls for tenders the Commission aims to purchase goods, services or works in exchange for payment of an agreed price.

In a nutshell:

- Payment to agreed conditions and price
- Delivery of goods, services or works in compliance with predefined requirements
- Execution according to contractual conditions.

ExpectedOutcome:

Projects are expected to contribute to the following expected outcomes:

- Significant number of experimental citizen science initiatives kick-started;
- Significant number of citizen science initiatives supported to become sustainable;
- Significant number of newcomers to the Framework Programme and a significant number of citizens involved in co-producing scientific knowledge;
- Increased recognition of excellent citizen science initiatives throughout the European Research Area;
- Improved evidence base for making policy on citizen science.

These targeted outcomes in turn contribute to medium and long-term impacts:

- Increased engagement of citizens with science and researchers with citizens;
- Increased public trust in science;
- Increased alignment of strategic research with society needs, expectations and values;
- Better understanding among citizens of the process of building scientific knowledge through experimentation;
- Increased capacity in the EU R&I system to conduct open science and to set it as a *modus operandi* of modern science;
- A more open and inclusive research and innovation system. Scope:

Citizen Science is a rapidly emerging mode of research and innovation that shows huge promise in terms of collecting new qualities and quantities of data, harnessing collective intelligence, improving science-society literacy, and improving the relationship between science and society. However, financial support is not well adapted to the needs of small-scale and experimental activities and many citizen science initiatives that have proven their worth fail to sustain over the longer term. In addition, citizen science is under-recognised for its role in bridging between science and society, under-utilised where it is needed such as in relation to the Green Deal and the Sustainable Development Goals, and practitioners of citizen science are insufficiently recognised within the EU research and innovation system as conducting high-quality activities that can have numerous side-benefits.

In order to help remedy these weaknesses in the European research and innovation system, this action will launch two calls for proposals through financial support to third

Reforming and enhancing the EU research and innovation system

Introduction

Horizon Europe has a new level of ambition – to maximise the impact of EU research and innovation funding for European science, economy and the wider society. It marks a paradigm change in the design of the EU R&I Framework Programmes (FP) from an activity-driven to an impact-driven programme. Coupled to this ambition is the relaunching of the European Research Area (ERA) as described in the recently published Commission Communication entitled A new ERA for Research and Innovation (COM/2020/628 final of 30.09.2020).

The COVID-19 pandemic demonstrates the importance of R&I cooperation to deliver solutions to society's most demanding needs. Delivering Europe's recovery is a priority as are the green and digital twin transitions. To match these challenges, a new level of ambition that links better R&I with the economy, as well as with education and training, is necessary to put the EU's scientific knowledge to work.

The new ERA calls for deepening existing priorities and initiatives through new and stronger approaches. The green and digital transitions and the recovery call for cooperation between the Commission and the Member States. They require the setting of new priorities, launching ambitious joint initiatives and developing common approaches between policies.

To address these requirements, Destination 3 of Annex 11 of the Horizon Europe Work Programme, will support efforts to reform and enhance the EU R&I system. Destination 3 is built around four strands corresponding to the four objectives set out in the ERA Communication: 1. Prioritise investments and reforms; 2. Improve access to excellence; 3. Translate R&I results into the economy and 4. Deepen the ERA. The principle of excellence, meaning that the best researchers with the best ideas that respond best to the societal challenges obtain funding, remains the cornerstone for all investments under the ERA.

Strand 1 recognises the importance of prioritising investments and reforms to accelerate the green and digital transformation and to increase competitiveness as well as the speed and depth of the recovery. It offers support for policy makers and addresses the need for better analysis and evidence, including simplifying and facilitating the inter-play between national and European R&I systems.

Strand 2 addresses the need to improve access to excellence and to increase the performance of R&I systems, building on dedicated Horizon Europe measures as well as complementarities with smart specialisation strategies under the Cohesion Policy.

Horizon 2020 Framework Programme (H2020)

clear filter

• **All documents will be unavailable** in the Grants and Audits Management Services, in the Participant Register Services and in "My Expert Area" **on Friday, 02.07.2021, between 20:00 and 22:00 CET.** Please refrain from launching any document-related process, since these will not work and moreover, will have to be restored by the Service Desk.

The Horizon Results Booster addresses projects eager to go beyond their Dissemination and Exploitation (D&E) obligations under Horizon 2020 - steering research towards strong societal impact and concretising the value of R&I activity for societal challenges. In order to help the beneficiaries get a step further and better implement their D&E actions, the European Commission offers free consulting services through the Horizon Results Booster.

All about the services

What services?

The Horizon Results Booster offers 3 types of services:

1. Help and guidance for:
   - creating a results portfolio with other projects (module A),
   - creating and executing common dissemination strategy for a cluster of projects (module B)
   - improving existing exploitation plan (module C)
2. Tailor made support services to develop a business plan

Key information:

- Informative Brochure
- Website
- Application form
- Email contact

Application process

Who can apply?

Ongoing or completed FP7/H2020 projects, either as an individual project or as a part of a project group (depending on the services).

Project consortium can benefit from **one specific service only once** but it can apply for the three different services altogether.

The project and/or project groups will have access to the services they request based on their motivation, commitment and maturity of their

Work as an expert

The European Union Institutions appoint external experts to assist in the evaluation of grant applications, projects and tenders, and to provide opinions and advice in specific cases.

In particular, experts assist in:

- **Evaluation** of proposals, prize applications and tenders
- **Monitoring** of actions, grant agreements, public procurement contracts

In addition, experts provide opinion and advise on:

- **Preparation, implementation and evaluation of EU programmes and design of policies.**

In order to select experts, the European Union Institutions publish regularly calls for expression of interest (see list below) detailing the selection criteria, the required expertise, the description of the tasks, their duration and the conditions of remuneration.

Interested? Please join the database of external experts!

These pages are updated with the answers to the most frequent questions that have been submitted to the Research Enquiry Service and Participant Validation, IT Helpdesk, eProcurement Helpdesk, Call Coordinators and H2020 NCP correspondents.

In case of questions related to a call for tenders, there is always a specific timeslot to ask questions and requesting information, clarification must be done exclusively within the call for tenders on eTendering. Read about calls for tenders.

The IT Helpdesk answers your questions about the Funding & Tenders Portal tools and processes.
Europe Direct
Questions about the EU? Europe Direct can help.
Research Enquiry Service
The Research Enquiry Service answers questions about European research, in particular the EU Research Programmes. The same service also deals with inquiries about the validation process of legal entities for all the EU programmes. However, you are requested to contact the Validation Services via the Participant Register first. If you do not have access to the Participant Register, you can submit here your enquiry.
National Contact Points (NCPs) for Horizon Europe
The network of National Contact Points (NCPs) is the main structure to provide guidance, practical information and assistance on participation in Horizon Europe. NCPs are also established in many non-EU and non-associated countries ('third-countries').
