5TH FRAMEWORK PROGRAMME 51

ANNEX – DETAILED PROJECT OVERVIEW 52

EXECUTIVE SUMMARY

This document provides an overview of the main EU Research and Innovation (R&I) actions for and with cities, promoted both at the European and international level to foster sustainable urban development.

Cities face unprecedented challenges in terms of economic, social and environmental resilience, governance and management. At the same time, cities are hubs of innovation and wealth creation, and magnets for an ever increasing urban population.

The aim of the EU R&I agenda is to support cities and urban regions in becoming actors of open innovation and being open to the world as ambassadors of the European excellence in research and innovation. This will help them to accelerate the transition to sustainable, low-carbon societies.

An integrated Research and Innovation Framework for Smart and Sustainable Cities intends to:

- Better co-ordinate, streamline and focus the existing and future research and innovation activities and initiatives on urban issues across Horizon 2020 and future Framework Programmes.

- Enable a sustainable and systemic approach to innovation, by fostering co-creation, co-development and co-implementation with different actors and citizens in cities across the Union and worldwide.

- Develop new business and governance models, mobilise new partnerships and investments, and facilitate market uptake of visionary solutions and approaches needed to enhance urban resilience.

- Provide the knowledge and evidence base to inform decision on investments in key infrastructure for cities and urban regions as well as to inform policy-making, planning and land use management.

Europe can capitalise on over 30 years of investment in transnational EU Research and Innovation (R&I) on sustainable urban development. This document provides a comprehensive overview of current actions and projects funded through Horizon 2020 and the past three framework programmes.

The EU investment in urban related projects alone in the first four years of Horizon 2020 amounts to around 1.7 billion EUR for 612 projects across the three pillars of Horizon 2020, Excellent Science, Industrial Leadership and Societal Challenges. The investment in FP7, FP6 and FP5 were respectively 1.9 billion EUR; 0.4 billion EUR and 0.5 billion EUR.

EU RESEARCH AND INNOVATION FOR AND WITH CITIES

EU RESEARCH AND INNOVATION FOR SUSTAINABLE URBAN DEVELOPMENT

Europe stimulates cities to be actors of Open Innovation in responding to the present environmental, social and economic challenges. European cities currently house 72% of the European population, which is predicted to rise to 80% by 2050. The EU Research and Innovation policy in this area is supported by Horizon 2020, the main instrument in which new research and innovation on sustainable urban development is developed. The main policy goals are to spur novel solutions and partnerships to urban challenges and to create an open community of practice.

An integrated Research and Innovation Framework for Smart and Sustainable Cities intends to:

- Better coordinate, streamline and focus the existing and future research and innovation activities and initiatives on urban issues across Horizon 2020 and future Framework Programmes.

- Enable a sustainable and systemic approach to innovation, by fostering co-creation, co-development and co-implementation with different actors and citizens in cities across the Union and worldwide.

- Develop new business and governance models, mobilise new partnerships and investments, and facilitate market uptake of visionary solutions and approaches needed to enhance urban resilience.

- Provide the knowledge and evidence base to inform decision on investments in key infrastructure for cities and urban regions as well as to inform policy-making, planning and land use management.

EU Research and Innovation is steered to stimulate Open Science, Open Innovation and to be Open to the World. EU Science, Innovation and International collaboration support the response of Europe to the New Global Urban Agenda.

The EU investment in urban related projects alone in the first four years of Horizon 2020 amounts to around 1.7 billion € for 612 projects across the three pillars of Horizon 2020, excellent science,, Industrial leadership and societal challenges. The investment in FP7, FP6 and FP5 were respectively 1.9 billion EUR; 0.4 billion EUR and 0.5 billion EUR.

Inspiring examples of projects in various areas are included in the brochure "Investing in European Success: Innovating Cities in Europe and Worldwide"

1. Horizon 2020: Addressing Major Urban Challenges

1.1. H2020 Excellent Science

The EU supports excellence in Science for sustainable urban development through Frontier Research by the European Research Council (ERC), Marie Skłodowska-Curie Actions for research training and career development focused on innovation skills, and Future and Emerging Technologies. (See annex I- H2020 p.1-10)

- **European Research Council (DG RTD)**

The ERC's mission is to encourage the highest quality research in Europe through competitive funding and to support investigator-driven frontier research across all fields, on the basis of scientific excellence.

The ERC=ScienceSquared campaign on 'Cities of the Future' features nine ERG grantees who have developed research on cities presented under the title 'Wanted: The Human City'.

An overview of ERC actions that have focused on sustainable urban development in H2020 (59 projects with around 100 MIL EUR EU support and FP7 (60 projects with 100 MIL EUR EU support) is available in the annexes.

Website – European Research Council

Website – ERC Science Squared - Wanted: The Human City

- **Marie Skłodowska-Curie Actions (MSCA) (DG EAC)**

The Marie Skłodowska-Curie Actions support research training and career development focused on innovation skills. The programme funds worldwide and cross-sector mobility that implements excellent research in any field (a "bottom-up" approach). There are MSCA grants for all stages of a researcher's career, from PhD candidates to highly experienced researchers, which encourage transnational, inter-sectoral and interdisciplinary mobility.

An overview of MSCA actions that have focused on sustainable urban development in H2020 (127 projects with 89.3 MIL EUR EU support), FP7 (32 projects with 37.5 MIL EUR EU support) and FP6 (29 projects with 10.6 MIL EUR EU support) is available in the annexes.

Website - Marie Skłodowska-Curie Actions

- **Future and Emerging Technologies (FET) (DG RTD)**

The Future and Emerging Technologies actions aim to turn Europe's excellent science base into a competitive advantage. FET actions are expected to initiate radically new lines of technology through unexplored collaborations between advanced multidisciplinary science and cutting-edge engineering.

An overview of FET actions that have focused on sustainable urban development in H2020 (2 projects with 5.6 MIL EUR EU support) is available in the annexes.

Website – Future and Emerging Technologies

1.2. H2020 Industrial Leadership

The EU involves the private sector for Research and Innovation for sustainable urban development by supporting Leadership in Enabling and Industrial Technologies and Innovation in SME's. (See annex I - H2020 p.11-21)

- **Leadership in Enabling and Industrial Technologies (LEIT) (DG RTD)**

Aiming at new and breakthrough technologies, this part of the H2020 programme contributes to boosting competitiveness, creating jobs and supporting growth. The emphasis is on areas of research and innovation with a strong industrial dimension and where mastering new technological opportunities will enable and drive innovation. The objective is to achieve the EU Industrial policy goals, which represents an important component of the EU Strategy for Key Enabling Technologies (KET).

From all LEIT actions, the following Public-Private Partnerships focus on two themes with a direct impact on sustainable urban development. PPP's were launched by the European Commission in cooperation with industrial partners as part of the European Economic Recovery Plan.

The Public-Private Partnership (PPP) on Energy-efficient Buildings (EeB) aims to develop affordable breakthrough technologies and solutions at building and district scale, facilitating the road towards future smart cities. The roadmap for 2014-2020, agreed amongst a wide community of stakeholders, sets a vision and outlines routes towards a high-tech building industry, which turns energy efficiency into a sustainable business.

Historic energy-efficient buildings are also a core part of the ECTP – European Construction Technology Platform, one of the industry-led stakeholder forum recognised by the European Commission. The ETCP includes a Focus Area on Cultural Heritage and Regeneration.

The European Green Vehicle Initiative (EGVI) - Public-Private Partnership (PPP) - aims to deliver green vehicles and mobility system solutions that match the major societal, environmental and economic challenges ahead. With a focus on the energy efficiency of vehicles and alternative powertrains, the EGVI PPP aims at accelerating research, development and demonstration of technologies allowing the efficient use of clean energies in road transport.

An overview of LEIT actions in H2020 that have focused on sustainable urban development (57 projects with 216 MIL EUR EU support) is available in the annexes.

Website – Leadership in Enabling and Industrial Technologies

Website – PPP on Energy-efficient Buildings

Website – European Construction Technology Platform

Website – European Green Vehicle Initiative

- **Innovation in SME's (DG RTD)**

The objective of 'Innovation in SMEs' is to optimise the Research, Development & Innovation environment for SMEs, including through the establishment and facilitation of a range of support services, with the aim of strengthening the innovation capacity of SMEs and creating value on the market and/or into society, thus underpinning the Europe2020 strategy for smart, inclusive and sustainable growth. A range of actions contributes to building innovation management capacity for Small and Medium Enterprises: The SME instrument and Enterprise Europe Network.

An overview of Innovation in SME's actions in H2020 that have focused on sustainable urban development (168 projects with 73.5 MIL EUR EU support) is available in the annexes.

Website – EU R&I innovation in SME's

1.3. H2020 Societal Challenges

Horizon 2020 supports different solution-oriented initiatives to respond to the complexity of Societal Challenges related to cities and urban areas. (See annex I - H2020 p.21-34)

Website - RTD Innovating Cities

- **Large Demonstration Projects (Innovation Actions) (DG RTD + DG ENER + DG MOVE + DG CONNECT)**

Multiple large scale demonstration projects are launched in the framework of the cross-cutting Focus Area on 'Smart and Sustainable Cities', which called for a systemic approach to stimulate sustainable urban development, in which cities act as living labs to create an open innovation ecosystem. "Frontrunner" cities develop and test innovative solutions. These solutions are deployed at a wider scale through peer-learning with dedicated "follower" cities.

More specifically:

The innovation actions "Demonstrating innovative nature based solutions in cities" are aiming by 2020 to healthier and greener European cities, with a focus in 2017 on social cohesion and urban regeneration and in 2016 on enhancing water and climate resilience.

These demo projects are widening the solution portfolio beyond technological innovation and include social innovation for new governance, finance and business models that can help develop new and sustainable markets for innovative solutions. Four H2020 projects have just kicked off, with a total budget of over 50 MIL EUR, demonstrating how European and international cities can work together to develop and deploy nature-based solutions to address climate change impacts and water-related challenges. Cities from China, Brazil, Colombia, Argentina and Vietnam are committed to cooperate with European cities and create a strong community of practice.

A large demonstration project on Urban Regeneration through Cultural Heritage was also founded in 2016, the project ROCK 'Regeneration and Optimization of Cultural heritage in creative and Knowledge cities'

"Smart Cities and Communities lighthouse projects" aims to demonstrate solutions at district scale integrating smart homes and buildings, smart grids (electricity, district heating, telecom, water, etc.), energy storage, electric vehicles and smart charging infrastructures as well as latest generation ICT platforms which must be based on open specifications. This should be accompanied by energy efficiency measures and the use of very high shares of renewables at the level of districts. The goal is to facilitate a successful transformation towards intelligent, user-driven and demand-oriented city infrastructures and services.

In the period 2014-2017 Horizon 2020 has committed a budget for Smart Cities and Communities calls of 214.7 MIL EUR and for Sustainable cities calls of 70.9 MIL EUR

The geographical overview of the Sustainable Cities Large Scale Demonstration Projects is available on the H2020 SC5 Data Hub.

- **Booklet: "Investing in European Success: Innovating Cities in Europe and Worldwide"**

Horizon 2020 is the main financial instrument implementing the Innovation Union, a Europe 2020 flagship initiative aimed at securing Europe's global competitiveness. It aims to bridge the gap between research and the market by helping innovative enterprises develop their technological breakthroughs into viable products and services. Building on the success of previous research framework programmes, this booklet presents a selection of results from EU funded projects that have shown great strides in innovation, which will make a positive change to our daily lives.

This booklet provides a snapshot of EU-funded projects which illustrate how European research and innovation contribute to this global initiative, showcasing the potential of international collaboration in science for diplomacy. It presents a selection of recent projects supported through the EU's Seventh Framework Programme for research and technological development (2007-2013), focusing on the seven research priorities identified within the Environment research theme.

Website – RTD Innovating Cities (to be published October 2017)

- **European Capital of Innovation Award (iCapital) (DG RTD)**

The European Commission created the European Capital of Innovation award to acknowledge the role of cities as places of systemic innovation, with a capacity to connect people and places, and public and private actors. The first award was won by Barcelona in 2014, for its 'Barcelona as a people city' initiative, which made use of new technologies to bring the city closer to people, fostering economic growth and the welfare of its citizens. Amsterdam won in 2016 for creating an innovation ecosystem with four dimensions (smart, start-ups, liveability and digital social innovation) around the traditionally open approach of its citizens (Innovation is in the city's DNA).

In 2017 the European Commission has launched the third edition of the award. The 2017 Capital of Innovation will win EUR 1 000 000 to scale up its innovation activities. The two runners-up in second and third place will each receive EUR 100 000.

Applicant cities are judged on the innovative solutions to their relevant societal challenges reported in their application. Cities will particularly have to prove how they create the local conditions to innovate by:

- Experimenting – Innovative concepts, processes, tools, and governance models your city is implementing as a test-bed for innovation. How is your city mainstreaming these innovative practices into its urban processes?

- Engaging – How your city offers increased opportunities to citizens to innovate and ensures the uptake of their ideas.

- Expanding – How is your city attracting new talents, resources, funding, investments through its innovative practices, and how this helps become a role model for other cities?

- Empowering – Concrete and measurable added value directly connected to the implementation of innovative practices.

The third iCapital will be awarded at the end of 2017. A network of Alumni from the iCapital award has been established to exchange practices and approaches on urban innovation.

Website - DG RTD iCapital

- **FOOD 2030 – Cities for food systems transformation (DG RTD)**

FOOD 2030 defines the R&I policy framework for Food and Nutrition Security of which food systems transformation in cities is a key component.

The challenge of providing the inhabitants of European cities with affordable, safe, and nutritious food is both urgent and complex. EU R&I develops the policy and implementation of FOOD 2030 activities on Food in Cities by providing R&I support through Horizon 2020 and actively implementing the European Research Area and Innovation Union. Both of which set out a framework that underpins European R&I programme alignment, leveraging of funds, sharing or resources and infrastructures, and access to data and knowledge by among others engaging and mobilising a wide diversity of actors, including city authorities, research institutes, economic actors, non-profit organisations and citizens.

EU R&I contributes to the FOOD 2030 objectives related to cities for food systems transformation under the Horizon 2020 Work Programme 2018-2020 focus area on Sustainable Food Security. Furthermore a recent study on food in cities has been conducted, the outcomes of which are included in this report.

The four priorities of FOOD 2030 include: NUTRITION for sustainable and healthy diets; CLIMATE smart and environmentally sustainable food systems; CIRCULARITY and resource efficiency of food systems; INNOVATION and empowerment of communities.

The European Union collaborates with the Milan Urban Food Policy Pact, which is an international protocol engaging the largest number of cities throughout the world for the development of food systems, based on the principles of sustainability and social justice. It is a commitment for the coordination of international food policies and currently engages 148 signatory cities.

Website - FOOD 2030

Website – SWD (2016) European R&I for Food and Nutrition Security

Website – Milan Urban Food Policy Pact

- **ERA-NET Cofund Electric Mobility Europe (EMEurope) (2016-2021)**

EMEurope is bringing together over 20 public funders from European Member and Associated States and the Commission with a budget of around 25 MIL EUR (8 MIL EUR from the Commission). This initiative is building up on the results and experiences from the concluded ERA-NET Plus Electromobility+ and aims at contributing to the breakthrough of electric mobility in Europe, in particular in urban areas, contribute to the European White Paper objective to promote zero emission mobility in European cities.

The project started the 1st October 2016. A transnational call for proposals has been launch at the beginning of the year and 33 project proposals have been received and are under evaluation. The selected projects are supposed to start at the end of 2017.

They cover the 4 main following areas for highly visible demonstration and implementation projects: System integration (transport, [sub]urban areas), Integration of urban freight and city logistics in the e-mobility, Smart Mobility concepts and ICT applications, Public Transport, Consumer behaviour and societal trends.

Website – Electric Mobility Europe

- **Societal Challenge 'Smart, Green and Integrated Transport' - Urban Mobility (DG RTD + DG MOVE)**

In Horizon 2020 (2014-2020), the societal challenge 'Smart, green and integrated transport' addresses urban mobility related issues and concerns through its three main calls (Mobility for Growth, Automated Road Transport and Green Vehicles). Since its launch in 2014, topics have been conceived to respond to both environmental concerns and to address new societal imperatives linked to demographic changes, new mobility patterns, sharing economy, accessibility and inclusion.

The Transport WP 2018-2020, which is now under preparation – adoption in the Autumn 2017, includes several topics bringing forward the electrification of transport in urban contexts, addressing the complexity of connected and automated transport in urban environments and supporting the development and deployment of new mobility services and transport related business models with particular attention to the urban dimension.

As part of the Green Vehicles Call, several topics were proposed in the field of urban mobility. In particular, the focus will be on the next generation of electrified vehicles for urban use, being urban vehicles for passengers (including usability of elderly and disable) and commercial vehicles for last/first mile delivery of goods.

These actions are complemented by the CIVITAS 2020 programme and also the 'Smart Cities' initiative.

CIVITAS 2020

Since 2002 the Commission CIVITAS initiative supports cities in testing new technologies and innovative concepts for better and more sustainable urban transport. CIVITAS cities take an integrated planning approach that addresses all modes and forms of transport in cities. They aim to demonstrate that it is possible to ensure a high level of mobility for all citizens, offer a high quality of urban space and protect the environment through sustainable mobility. It is this integrative approach based on innovation, collaboration, research and results-orientation that sets CIVITAS apart; this is demonstrated in "living lab" projects. There are also research projects under CIVITAS 2020 that focus on establishing new knowledge or exploring the feasibility of a new or improved technology, product, process, service or solution related to transport.

The following may be included if they aim to demonstrate:

- the technical feasibility of cleaner, better transport options for cities;
- basic and applied research;
- the development and integration of technology;
- testing and validation in small-scale demonstrations or pilot activities.

Currently three big CIVITAS "living labs" projects are underway: ECCENTRIC, PORTIS and DESTINATIONS, and a number of research projects.

CIVITAS is also a growing network of cities, and for cities, to achieve cleaner, better connected transport solutions in Europe and beyond. It helps, finally, to bridge the transport innovation with citizens and stronger political commitment (through the Political Advisory Committee). More than 85 European cities have so far participated in CIVITAS demonstration projects, with over 800 measures. Up till now, Horizon2020 has funded 25 large projects in urban mobility under the CIVITAS brand, for a sum of EUR 130 million. The CIVITAS Forum network of cities has today more than 280 cities.

Website – RTD SC4 Smart, Green and Integrated Transport

Website - CIVITAS

2. Open Community of Practice of Urban Innovators, Doers and Thinkers

2.1. European Innovation Partnership - Smart Cities and Communities (EIP-SCC) (DG ENER + DG MOVE + DG CONNECT)

The European Innovation Partnership on Smart Cities and Communities (EIP SCC) is one of the innovation partnerships announced by the European Commission ''Europe 2020 Flagship Initiative - Innovation Union Communication''1, to create an innovation-friendly environment that makes it easier for great ideas to be turned into products and services that will bring our economy growth and jobs.

The European Innovation Partnership on Smart Cities and Communities (EIP-SCC) is a partnership across the areas of energy, transport and information and communication technologies with the objective to catalyse progress in areas where energy production, distribution and use, mobility & transport, information and communication technologies (ICT) are intimately linked and offer new interdisciplinary opportunities to improve services while reducing energy and resource consumption and greenhouse gas (GHG) and other polluting emissions. It looks to establish strategic partnerships between industry, innovative SMEs, European cities and other stakeholders at local level and across borders in Europe. Major challenges include adopting a cross-sector approach, and making necessary change in the existing financial models, procurement regimes, regulatory framework and knowledge base.

The EIP SCC is not directly funded by EU spending programmes such as Horizon 2020 or the Connecting Europe Facility, but it aims to deploy the results of EU funded projects (such as in Horizon2020 and ESIF). The EIP SCC Marketplace aims to bring together cities, industry, SMEs, banks, research and other smart city actors. Currently 5700 organisations have signed up.

Activities are currently grouped in 6 strands, called "Action Clusters":

- Business Models, Finance and Procurement
- Citizen Focus
- Integrated Infrastructures & Processes (including Open Data)
- Policy & Regulations / Integrated Planning
- Sustainable Districts and Built Environment
- Sustainable Urban Mobility (including low-carbon vehicles and new mobility services)

The European leadership on smart cities features in the Commission White Paper on the future of Europe2. The Digital Single Market strategy along with the Energy Union and the Urban Agenda for the EU3 are the strong political anchors for this initiative.

Website - EIP Smart Cities

Website – EIP-SCC Market Place

Website – Smart Cities Info System

2.2. Knowledge Exchange Platform (KEP) (DG RTD)

The Knowledge Exchange Platform (KEP) is a form of cooperation between the European Committee of the Regions (CoR) and the European Commission's Directorate-General for Research and Innovation (DG RTD). It seeks to present new research and innovation (R&I) solutions, innovative products and best practice in response to societal challenges facing local and regional authorities in Europe.

---

[1] SEC(2010) 1161 https://ec.europa.eu/research/innovation-union/pdf/innovation-union-communication_en.pdf

[2] *''We are already a leader in "smart cities"* (pg.10)

[3] We therefore try to integrate the results of the work described here into the Digital Transition Partnership launched in January 2017 under the latter.

In 2016, the KEP events covered the themes of Bioeconomy and Key Enabling Technologies. The themes agreed for 2017 are Energy and Public Sector Innovation including the role of local governments.

The KEP operates via Thematic Seminars (held in Brussels, organized by CoR and DG RTD); Peer-to-Peer Events (held in the regions, organized by a CoR member locally); and Showcasing Events (organized by others but contributing to the KEP annual Action Plan)

Website – Knowledge Exchange Platform

2.3. Nature-based Solutions Platforms, Community and Evidence Base (DG RTD)

Think Nature is a platform that supports the understanding and the promotion of Nature-based Solutions (NBS) in urban areas. Oppla is an open platform for collaboration between communities of science, policy and practice on biodiversity, ecosystems services and nature-based solutions, and it is also a knowledge marketplace to make research outputs publicly available. EKLIPSE is the Commission's science-policy mechanism on biodiversity and ecosystem services. Upon request from EC R&I, it has developed an impact evaluation framework for Nature-based Solutions to promote climate resilience in urban areas. Currently another EKLIPSE expert working group is assessing and synthesizing relevant knowledge related to the types and characteristics of urban and peri-urban natural spaces that have significant impact on human mental health and mental well-being.

Another contribution to the development of the evidence base was the compilation of NBS city case studies. DG RTD produced a series of case studies, highlighting the systemic approach needed to make NBS most effective. They refer to the results of FP7 projects but also to information available on Climate-Adapt, Natural Water Retention Measures, BISE and other ecosystem-based approach platforms. For more on this, see the section on Scientific Review of FP7 projects on Nature-based Solutions in EU urban and peri-urban areas on page 25 in this report.

Website – Think Nature

Website – Oppla – NBS City Case Studies

Website – EKLIPSE

2.4. Multilevel Third Space for Systemic Urban Research & Innovation (DG RTD)

The Multi-level Third Space for Systemic Urban Research and Innovation is intended as a neutral physical and/or virtual space where multiple actors meet to prototype innovative solution to common urban challenges. The space is co-owned and stimulates engagement at all levels (citizen, civic, middle ground, local, national, European level). It intends to stimulate interactive processes to discuss and develop recommendations for policy on systemic urban research and innovation.

A systemic approach in this context entails open-systems thinking and helps the development of an innovation ecosystem. Through this perspective one approaches cities as a system of systems. This approach stimulates multi-level, multi-dimensional and multi-sectorial interactions, incorporating multi-stakeholder processes and creating integrated solutions.

The Third Space was launched as a joint initiative between DG RTD and JRC during the lab session on cities at the EU Policy Lab - Lab Connections event in October 2016.

Website - JRC blog post on the Multi-Level Third Space

Website - Multi-Level Third Space Slack Team

2.5. Social Innovation Community (SIC) (DG RTD)

The Social Innovation Community (SIC) is a platform which puts together a range of social innovation organisations and networks which have emerged in Europe in recent years to tackle the increasingly complex and interrelated public challenges.

Starting from the premise that we need more open innovation approaches, SIC is running a series of on- and offline activities - including practical place-based experiments, learning, policy and research - to support public decision-makers and other stakeholders to work more effectively with social innovators.

In this regard, it is worth mentioning that the first Horizon Prize for Social Innovation was launched in 2016 to reward the innovator or team who comes up with the best solution to address the challenges and opportunities of ageing population and to improve the quality of life of senior citizens. Their breakthrough will receive 2 MIL EUR.

Website – Social Innovation Community

3. Joint Programming Initiative Urban Europe (JPI UE) (DG RTD)

The Joint Programming Initiative (JPI) Urban Europe is an EU Member State lead initiative promoting strategic research and innovation cooperation between EU Member States and Associated Countries to address major societal challenges in European urban areas. The initiative aims, firstly, to tackle the fragmentation of research and innovation by having countries and actors voluntarily work together and pool national research resources; and secondly, to enhance capacities and knowledge as well as develop concrete solutions for urban areas at local, national or European levels.

Among the long-term goals of the JPI Urban Europe is the enhancement of knowledge towards sustainable urban transition by supporting such R&I activities that focus on inter-disciplinary and cross-sectorial urban matters and evidence-based policy-making including the support for the EU Urban Agenda.

The JPI Urban Europe adopted its Strategic Research and Innovation Agenda (SRIA) in September 2015, which comprises a long-term strategy and programme for the initiative for the period 2015-2020 and calls for a systemic approach to smart, green and inclusive cities.

Joint calls for R&I proposals have been launched across national programmes and by building ERA-NET Cofund Actions under H2020 to implement the SRIA. The Horizon 2020 ERA-NET Cofund Actions support public-public partnerships in the preparation and establishment of funding agencies networking structures as well as in the design, implementation and coordination of joint activities. For the ERA-NET Cofund Actions, Horizon 2020 provides funding in a form of topping up of single joint calls and it can also support additional activities such as transnational networking. The JPI Urban Europe is currently coordinating three ERA-NET Cofund Actions (under Societal Challenges 3, 5 and 6).

Under the H2020 priority Spreading Excellence and Widening Participation call WIDESPREAD-02-2016: Support to JPI Urban Europe, the JPI Urban Europe was awarded a grant of 1.5 MIL EUR in 2016 to enlarge participation of its member countries and actors towards the Widening Countries. As part of the project, a Stakeholder Involvement Platform will be established that facilitates implementation of the Strategic Research Agenda, helps to reach out to new countries and urban actors and continues the co-creative approach.

Website - JPI Urban Europe

Website – Strategic Research and Innovation Agenda

EU RESEARCH & INNOVATION FOR MAJOR EU POLICY ACTIONS ON CITIES AT EUROPEAN LEVEL

1. Urban Agenda for the EU (DG REGIO)

The Urban Agenda for the EU strives to involve Urban Authorities in achieving Better Regulation, Better Funding and Better Knowledge.

EU Research and Innovation is contributing to the focus on Better Knowledge through R&I Studies and H2020 actions on urban development which are providing knowledge, data and recommendations to the different actions of the Urban Agenda for the EU.

EU Research & Innovation has contributed to the development of the 12 priority themes for the EU Urban Agenda: Jobs and skills in the local economy; Urban Poverty; Housing; Inclusion of Migrants and Refugees; Sustainable Use of Land and Nature-based Solutions; Circular Economy; Climate Adaptation; Energy Transition; Urban Mobility; Air Quality; Digital Transition; Innovative and Responsible Public Procurement, which have been confirmed in the Pact of Amsterdam in May 2016.

Website - Urban Agenda for the EU

1.1. EU Urban Partnerships

The Urban Agenda for the EU is being implemented through the EU Urban Partnerships. The aim of the partnerships is to develop Policy Recommendations on the topic of the partnership through active collaboration of its members which are representatives from cities, governments, EU institutions and other stakeholders working on a voluntary basis. The partnership lasts for 3 years.

EU R&I contributes to the EU Urban Partnerships on Air Quality, Innovative and Responsible Public Procurement, Climate Adaptation, Sustainable Use of Land and Nature-Based Solutions, Energy Transition, Circular Economy and Urban Mobility through active involvement in meetings, assistance in developing Mappings of R&I initiatives, contributions for the Policy development and by providing data and knowledge from EU R&I projects, as well as connections with ongoing projects.

Website - Urban Agenda for the EU Partnerships

1.2. EU Topic Page on Cities

The EU Topic Page on Cities is a 'One Stop Shop' on the topic of cities under the corporate EUROPA website. It is an online single entry point for cities and stakeholders that provides an overview of all initiatives and support mechanisms provided by the European Union to Cities.

EU R&I contributes to the EU Topic Page on Cities with the latest information on R&I funding opportunities, R&I policy initiatives and actions, events, data and knowledge. The yearly updated version of this Mapping document is also displayed on the EU Topic Page on Cities.

The EU Topic Page on Cities was launched in October 2016 by DG REGIO in cooperation with multiple other DG's. It covers the following information: Urban Agenda for the EU; Action for Cities; Knowledge for Cities; Priority Themes; Funding for Cities; Cities Events.

Information on EU policies, funding, knowledge, which were presented on several internet pages and platforms have been linked together from the perspective of what is important for cities.

Website - Europa Topic Page on Cities

1.3. Better knowledge

- **Urban Data Platform (JRC)**

The Urban Data Platform is the Data sharing and visualization platform for European cities and regions developed by the Joint Research Centre.

EU R&I is currently not yet contributing to the Urban Data Platform but alignment in the future can be developed.

Website – Urban Data Platform

- **Eurostat dedicated webpage on City statistics (ESTAT)**

The Eurostat dedicated webpage on City statistics provides direct access to the City statistics database, the related methodologies and statistical publications as well as the visualisation tools developed by Eurostat for city data. The datasets encompass statistical information on individual cities and on their commuting zones (the so-called Functional Urban Areas). The topics covered include demography, housing, health, labour market, education, environment, transport, tourism, etc. Data availability differs from topic to topic and year to year, as the statistics are provided on a voluntary basis only (there is no EU legislation on the collection of these statistics).

EU R&I is currently not yet contributing to the ESTAT dedicated webpage on City Statistics but alignment in the future can be developed.

Website - dedicated webpage on City statistics

- **Transport Research and Innovation Monitoring and Information System (TRIMIS)**

The Transport Research and Innovation Monitoring and Information System (TRIMIS) is led and funded by DG MOVE and managed by the Joint Research Centre. The system will:

- Make all EU and national transport Research & Innovation projects (with their results) available through an advanced search engine;
- Map and analyse research trends and innovation capacities across Europe's transport sector;
- Highlight mature innovations with the greatest promise for the future (helping to bridge the valley of death to deployment);
- Monitor the effectiveness of transport research programmes and funding at EU and Member State level;
- Identify gaps and priorities in transport research, to focus EU intervention on achieving higher impact;
- Support the design and implementation of the Strategic Transport Research & Innovation Agenda (STRIA) roadmaps, presented in the Mobility Package in May 2017;
- Contribute to the delivery of EU's energy, climate and transport policy goals.

Website - TRIMIS

- **European Soil Data Centre (ESDAC) (JRC)**

The European Soil Data Centre is the thematic centre for soil related data in Europe. Its ambition is to be the single reference point for and to host all relevant soil data and information at European level. It contains a number of resources that are organized and presented in various ways: datasets, services/applications, maps, documents, events, projects and external links.

EU R&I contributed to the ESDAC with a bulk of evidence and knowledge on peri-urban and land use management research. Namely from EU funded project TIMBE and HOMBRE which promoted a holistic management of Brownfield regeneration based on associated case studies (mining, urban, industrial) with a multi-stakeholder participation. It is worth noting that EU-funded research achieved a better understanding of the life cycle of urban, industrial and mining sites towards a successful overall brownfield redevelopment program and a Zero brownfields strategy. In addition, sustainable spatial (land-, urban) planning and decision making processes were developed to enhance the up-take of brownfield regeneration projects. In this context, different regeneration technologies were combined to address different site aspects or issues (e.g. linking soil, water, energy and materials) to create faster and cheaper solutions during brownfield regeneration.

Finally, effects of human mobility on urban settlement growth and restructuring in peri-urban areas where considered and in particular due to climate change affecting environmental parameters - as sea levels - augments risks of flooding, propagation of pollutants, dislocation of a great number of settlers. Integrated ecosystem approaches were developed incorporating social, economic and natural to deal with the complex and dynamic problems facing the coastal city environments. Main outcomes include tools for appropriate policies, scenario building, dissemination–exploitation of results for users' needs (e.g. for metropolitan areas of global importance and 8 of local importance in European and Asian countries (Belgium, Portugal, Italy, Sweden, United Kingdom, Israel, India, and Vietnam).

Website – European Soil Data Centre

- **Study on Food in Cities – Innovation for a Sustainable and Healthy Production, Delivery and Consumption of Food in Cities (DG RTD)**

This study aimed to provide an overview of the food innovation dynamics in cities, in addition to providing evidence on the role and impact of European funded projects in cities. Its findings are based on input provided by the Milan Urban Food Policy Pact (MUFPP) signatory cities and EUROCITIES members through an open survey, interviews, desk research and focus group meetings. More than 40 cities from Europe and nine cities from across the Globe participated in the survey. Among these, five cities (Rotterdam, Ljubljana, Gothenburg, Milan and Lisbon) were chosen for a more in-depth analysis of their food activities and the impact of EU funded projects.

Six types of innovation dynamic were identified in cities working on food related policy or projects: Emphasis on community buy-in; Enhancing participation in the governance system; Local empowerment as a policy goal; Shortening food supply chains; Systemic thinking; and Translocalism.

The main findings of impact of EU funded projects, based on the five case study cities are:

The benefit of cities as project partners; Project priorities need to be aligned with the city priorities; Research questions need to be defined together with the users; impact increases when cities learn and exchange with each other; and the importance of coordination with other sources of funding.

Nine research needs related to food in cities were identified: Connect bottom-up and top-down food initiatives; the use of smart technology; implementation of innovative procurement tenders; solutions for food poverty in cities; innovative solutions for urban farming; involvement and participation of the private sector; Systemic thinking; Missing data; green and blue logistics for food distribution and food waste collection.

Website – RISE Group Open Innovation – External Studies (to be published Sept 2017)

- **Study on Circular Economy in Cities: 'Cities as Living Labs: Increasing the Impact of Investment in the Circular Economy for Sustainable Cities' (DG RTD)**

The study aimed to understand the impact and added value of EU funded projects and to understand how innovative solutions and living labs are connected at city level to develop towards a circular economy, using the following analyses:

- Evaluate how cities have elaborated and implemented urban strategies in context of following three circular economy dimensions: 1) sustainable use of resources, natural and cultural capital, 2) circular mobility and 3) resource efficient buildings and urban spaces;
- Describe if and how the cities mobilise and interact with the various system innovation (SI) dimension including the Living Labs;
- Get a better understanding of the impact of EU funding especially from Horizon 2020 and the 7th Framework Programme projects focusing on circular economy at city-level in context of Living Labs.
-

From a general list of cities involved in EU-projects, fifteen European cities were asked to participate in a short survey in order get a better overview of their Circular Economy strategies and projects of which five cites were selected for in-depth case study review: Helsinki (FI), Manresa (ES), Lisbon (PT), Eindhoven (NL) and Riga (LV).

Based on its key findings the study provided the following policy recommendations:

- Develop synergies in the strategies and funding at EU, national, regional and local levels in order to enable longitudinal, transversal and holistic funding and research programmes;
- Incorporate a long term perspective in innovative Urban Circular Economy planning;
- Counter-balance the bias towards certain cities (and regions) in European Projects;
- Provide more support to cities as beneficiaries in EU-projects focusing on Circular Economy and Living Labs ;
- Innovation in Circular Economy requires a systemic approach where cities must act as key facilitators by stimulating co-creation, co-design and co-implementation with different actors and citizens at both the local and the international level;
- Promote new business models and alternative sources of funding at city level such as cooperatives, public-private partnerships, and crowd-funding where also citizens themselves can play an active role while establishing a platform for social innovation.
- Improve coordination across multiple levels of government to ensure collaboration between the different policy domains and actors;
- Strengthen capacity building and knowledge sharing at city and European level to foster systemic innovation processes.
- Support the creation of open data sources and digitalization to enable co-creation processes and innovation across Europe.

Website – RISE Group Open Innovation – External Studies (to be published Sept 2017)

- **Scientific Review of FP7 projects on Nature-based Solutions in EU urban and peri-urban areas (DG RTD)**

The FP7 projects GREEN SURGE, OPERAs, OpenNESS, TURAS, ARTS, RAMSES, BRIDGE, FASUDIR and ECODISTR-ICT addressed the sustainable management of natural resources in urban and peri-urban areas, in particular through ecosystem based approaches.

The review aimed to assess the impact of these FP7 projects on the locations they were implemented in and extract evidence regarding their impact on urban sustainability, including, e.g., stakeholder awareness and engagement, the promotion of systemic innovations for sustainable land use governance, or the adoption of systemic and integrated ecosystem-based solutions to tackle diverse societal challenges.

The review identified the following contribution to policy goals of the Nature-based Solutions agenda, in particular to provide the evidence-base and knowledge:

- Many European cities have implemented NBS – even if most of the times not explicitly - to tackle a series of societal challenges;

- These actions were identified, in light of the recent adoption of the NBS concept and then best practices were highlighted;

- These include NBS as such but also other actions considered as enabling the implementation of NBS;

- Most of the times the identified actions constitute a fragmented set of measures planned separately at different times by cities. But, if considered together, they can be seen as enabling synergies in tackling a series of challenges by providing key ecosystem services. The cumulative effect of these measures is greater than merely a series of individual projects.

The Review created 26 city case studies, which provide information on: multiple-benefits of Ecosystem-based Approaches when tackling societal challenges; issues that are inherent to NBS; and context-specific analyses that may be useful for NBS implementation.

The case studies represent a tool for disseminating knowledge on NBS effectiveness, multiple benefits, returns of investment and development opportunities.

Website - Case studies on Oppla

- **Policy Report - Review of FP7 projects on Systemic Urban Innovation (DG RTD)**

The overall purpose of this report is to highlight, showcase and provide an EU-wide evidence base of innovative, systemic and practical solutions in meeting urban societal challenges. The report capitalizes on 30 years of successful EU funded research and innovation projects, specifically those supported by the FP7 research Framework Programme.

The report highlights integrated policy solutions to these challenges that generate policy co-benefits simultaneously delivering socio-economic and environmental political objectives for regional, local city authorities, Civil Society, private sector, Industry (construction sector) and citizens. In particular the report presents the results of almost 40 projects, and the new knowledge and understanding generated by research and innovation, deploying a systemic and integrated analysis of the urban ecosystem, and the interconnected nature of the urban challenges arising in our cities.

To this aim, the report promotes systemic solutions which comprise nature-based, technological, digital, social, governance, regulatory innovations which offer new options for city managers and politicians in delivering integrated and participatory governance that defines, develops and delivers innovative strategies towards climate change mitigation and adaptation, social cohesion, social innovation and a robust economy. This report aims to provide city managers, political representatives and other city stakeholders with the inspiration of new ideas as well a practical guide and a European Reference Framework to innovate cities by deploying at large scale and upscaling these solutions and contribute to the creation of an EU leading global market towards sustainable, resilient, inclusive, healthy, creative and prosperous cities.

Website – RTD Innovating Cities (to be published October 2017)

2. Cohesion Policy

'Cohesion policy' is the policy behind the hundreds of thousands of projects all over Europe that receive funding from the European Regional Development Fund (ERDF), the European Social Fund (ESF) and the Cohesion Fund (Cohesion Fund applies to EU Member States which have a GDP lower than 90 % of the EU-27 average – Croatia not taken into account).

Economic and social cohesion – as defined in the 1986 Single European Act – is about 'reducing disparities between the various regions and the backwardness of the least-favoured regions'. The EU's most recent treaty, the Lisbon Treaty, adds another facet to cohesion, referring to 'economic, social and territorial cohesion'. The idea is that cohesion policy should also promote more balanced, more sustainable 'territorial development' – a broader concept than regional policy, which is specifically linked to the ERDF and operates specifically at regional level.

In 2014-2020 Cohesion Policy aims to strengthen the urban dimension and fight for social inclusion: a minimum amount of ERDF earmarked for integrated projects in cities and of ESF to support marginalised communities.

Cohesion Policy has set 11 thematic objectives supporting growth for the period 2014-2020 of which the first objective is to Strengthening research, technological development and innovation.

Website – Introduction to Cohesion Policy

2.1. Synergies between H2020 and the European Structural and Investment Funds

Strengthening synergies between Horizon 2020 and the European Structural and Investment Funds (ESI Funds) is about building meaningful interactions between investment strategies and interventions as a way to have significant impacts on the economy, combining place-based innovation investments in smart specialisation priorities with world-class research and innovation initiatives, thus ensuring a higher impact of the funds.

The synergy development is now expected to gain strength as both Horizon 2020 and the Common Provisions Regulation of the ESI Funds include for the first time a legal mandate to maximise synergies not only among these two instruments, but also with other programmes, such as COSME, Erasmus+ and the Connecting Europe Facility.

Synergies can take many forms, as the modes of planning and delivery vary between the Framework Programme/Horizon 2020 and the ESI Funds. The 'Guide on Synergies' provided taxonomy of five synergy-type actions at the project implementation level:

- Synergy type 1: Providing funding from alternative sources for positively evaluated Framework Programme/Horizon 2020 proposals but not funded due to insufficient Call budgets
- Synergy type 2: Funding actions that build research and innovation capacities of actors aimed at participating in the Framework Programme/Horizon 2020 or other internationally competitive research and innovation programmes (sequential - upstream)
- Synergy type 3: Funding actions that capitalise on already implemented Framework Programme/Horizon 2020 research and innovation actions aimed at market up-take (sequential - downstream)
- Synergy type 4: Combining funding from the Framework Programme/Horizon 2020 and the ESI Funds (and/or from other sources) for coordinated parallel actions that complement each other
- Synergy type 5: Bringing together funding from Horizon 2020 and the ESI Funds in an integrated research and innovation project that could be a single action or a group of inter-dependent actions or operations

Website – REGIO Report Enabling Synergies

2.2. Urban Innovative Actions (DG REGIO)

The Urban Innovative Actions (UIA) is an Initiative of DG REGIO that provides urban areas throughout Europe with resources to test new and unproven solutions to address urban challenges.

EU R&I contributes to the Urban Innovative Actions with policy advice in the development of the calls. The Urban Innovative Actions are distinctly different than the Horizon 2020 actions in as such that the UIA provide grants to single urban authorities, whereas in the H2020 Innovation Actions a consortium of partners related to and from multiple cities collaborate on one project. More synergies between the Urban Innovative Actions and H2020 Innovation Actions can be developed in the future.

The main objective of UIA is to provide urban areas throughout Europe with resources to test innovative solutions to the main urban challenges, and see how these work in practice and respond to the complexity of real life. The third and fourth Calls for Proposals will be respectively launched at the end of 2017 and 2018. Based on article 8 of ERDF, the Initiative has a total ERDF budget of EUR 372 million for 2014-2020.

Website - Urban Innovative Actions

3. Energy Union (DG ENER)

The Energy Union 2030 Strategy provides a framework to achieve EU energy and climate goals based on five interlocking dimensions. Its fifth dimension foresees an integrated strategy for research, innovation and competitiveness to deliver its overarching objectives of decarbonisation, energy efficiency and independence.

3.1. COM Accelerating Clean Energy Innovation

The European Union's strategy to boost research and innovation in clean energy solutions, laid out in the Communication Accelerating Clean Energy Innovation adopted in November 2016, recognises cities as key actors in the energy transition. In effect, sharing and upscaling best practice in cities is one of the 20 policy actions in this Communication (action 20).

EU R&I contributes to the implementation of this action by not only incorporating funding opportunities on smart, sustainable and inclusive urban development in the Horizon 2020 Work Programme 2018-2020, but also by facilitating the sharing and dissemination of results across cities initiatives and projects from different funding streams, and incentivising the mainstreaming and market uptake of successful clean energy solutions for cities.

Action 20 states: "The Commission will stimulate sharing and upscaling of best practices and smart, sustainable and inclusive urban demonstration projects, including those supported under the European Innovation Partnership on Smart Cities and Communities and under Urban Innovative Actions. This will also draw on data and products from the European Commission's Copernicus programme for Earth observation."

Website – COM ACEI

3.2. Strategic Energy Technology Plan (SET-Plan) (DG RTD + DG ENER)

The European Strategic Energy Technology Plan (SET-Plan) aims to accelerate the development and deployment of low-carbon technologies. It seeks to improve new technologies and bring down costs by coordinating national research efforts and helping to finance projects.

The SET-Plan has a Temporary Working Group on Smart Cities and Communities of which the stakeholders agree to develop tools and solutions to create more linkages between buildings, better integrating energy, ICT and transport in districts and urban planning tools at city level.

The main target of the Working group is to be a global role model/market leader in technology integration for and deployment of net–zero-energy/emission districts (ZEED) with the aim by 2025 to have at least 100 successful examples synergistically-connected to the energy system in Europe and a strong export of related technologies.

EU R&I contributes to the SET-Plan focused on cities through H2020 R&I budgets for Smart Cities and Communities.

Website – SET-Plan

3.3. Covenant of Mayors (CoM) (DG ENER + DG CLIMA)

The Covenant of Mayors (CoM) was launched in 2008 as a bottom-up movement of cities to facilitate the implementation of the 20/20/20 objectives – reducing CO2 emissions by at least 20% by 2020 on their territory. In 2014 the European Commission launched the Mayors Adapt initiative, inviting cities to voluntarily commit to anticipating and preparing for the impacts of climate change. Building on their success, the new Covenant of Mayors on Climate and Energy was launched in October 2015. The new Covenant informs, mobilises and supports cities to take action on mitigation and adaptation to climate change as well as access to clean and affordable energy, in line with the 2030 Climate and Energy policies.

EU R&I contributes to the Covenant of Mayors through the dissemination of outputs of EU-funded projects relevant for Covenant of Mayors cities. Collaborative actions are foreseen for systematic dissemination via the so-called "Covenant capacity-sharing corner", targeted dissemination for Covenant capacity-sharing activities through webinars, off-line training sessions and workshops, and dissemination of calls for proposals relevant for CoM signatories. Finally, the promotion of EU R&I activities and their benefits for signatories will be strengthened by the 'coalition of the willing', a group of organisations whose work is closely related and complementary to the Covenant of Mayors priority themes on Adaptation/Access to energy/Reporting & Monitoring/Financing.

In collaboration with the Covenant of Mayors Office, the European Commission (DG ENER and DG CLIMA) is supporting local climate and energy solutions by raising awareness on climate change mitigation and adaptation among city representatives (e.g., climate change networks to facilitate dialogue among relevant scientific communities), These actions are reinforced by the EU Research & Innovation Agenda on Adaptation (DG RTD), which contributes to closing knowledge gaps (e.g., Horizon 2020 supports research on the economics of climate change adaptation and on the design, testing, and deployment of innovative solutions to enhance climate resilience, with emphasis on nature-based solutions).

The Covenant of mayors is supporting signatories through specific methodological materials, e.g. The Urban Adaptation Support Tool (Urban AST) is a practical guidance tool to assist signatories of the Covenant of Mayors for Climate and Energy initiative in planning and taking adaptation action, and disseminated also through the Climate-ADAPT platform.

In June 2016, the Global Covenant of Mayors for Climate & Energy was launched, formally bringing together the Covenant of Mayors and the Compact of Mayors into the largest international alliance of cities and local governments with a shared long-term vision of promoting and supporting voluntary action to combat climate change and move to a low emission, resilient society, and fostering clean energy.

Website – Covenant of Mayors in the EU

Website – Climate-ADAPT

Website - Global Covenant of Mayors for Climate and Energy

4. Digital Single Market (DG CONNECT)

The Digital Single Market Strategy announced by the European Commission in May 2015 lays the groundwork for Europe's digital future, in which the free movement of goods, persons, services and capital is ensured and citizens and businesses can seamlessly and fairly access online goods and services, whatever their nationality, and wherever they live.

Delivering on its Strategy to create a Digital Single Market, the Commission unveiled on 19 April 2016 its plans to help European industry, SMEs, researchers and public authorities make the most of new technologies. The Commission Communications mentioned below, which are part of this plan, propose smart cities and energy related actions.

EU R&I contributes to the Digital Single Market priorities on cities through H2020 calls supporting digital technologies in multiple fields related to cities, e.g. smart and sustainable cities, ICT for cultural heritage in cities, citizen science, etc.

4.1. Communication on Digitising European Industry: Reaping the full benefits of a Digital Single Market

The Communication calls for streamlined cross-domain approaches to standardisation in areas such as eHealth, smart energy systems, intelligent transport systems and connected vehicles, advanced manufacturing, smart homes and cities to help progress their digital transformation.

4.2. Communication on a European Cloud Initiative-Building a competitive data and knowledge economy in Europe

The European Cloud Initiative builds on the Digital Single Market (DSM) Strategy, which aims, inter alia, to maximise the growth potential of the European digital economy. It aims to deploy the underpinning super-computing capacity, the fast connectivity and the high-capacity cloud solutions they need via a European Data Infrastructure.

The European Data Infrastructure will contribute to the digitisation of industry, to develop European platforms for new, strategic applications (e.g. medical research, aerospace, energy) and to foster industrial innovation. Industry, particularly SMEs without in-house capabilities and public authorities (e.g. smart cities and transport) will benefit from cloud-based and easy-to-use HPC resources, applications and analytics tools.

4.3. Communication on Priorities of ICT Standardisation for the Digital Single Market

The Communication acknowledges the work done in the area of smart appliances, which led to the creation of a common interoperability language - SAREF (Smart Appliances REFerence ontology) - which became a standard of ETSI and OneM2M (the Global initiative for Internet of Things standardisation) in 2015.

Nevertheless, the Communication underlines that additional work is needed in areas such as smart cities and energy to address the lack of interoperability between solutions implemented by Member States, agree on functional specifications, understand new service models, and continually improve cooperation between SDOs.

Website - Digital Single Market

5. Mobility Package (DG MOVE)

On 31 May 2017 the Commission adopted a Communication on 'Europe on the Move', calling for "An agenda for a socially fair transition towards clean, competitive and connected mobility for all" and identifying several initiatives to make this transition possible.

Website – Mobility Package – Europe on the Move

5.1. Towards Clean, Competitive and Connected Mobility: the contribution of Transport Research and Innovation to the Mobility Package (DG RTD + DG MOVE)

The specific R&I actions related to transport decarbonisation were outlined in the Commission Staff Working Document "Towards clean, competitive and connected mobility: the contribution of Transport Research and Innovation to the Mobility Package".

The contribution of transport R&I to achieve this common goal is translated into concrete short term (2020) and long-term actions (2030 and 2050), which have been identified for seven interconnected priority areas in an intermodal perspective. These priority areas are:

- Cooperative, connected and automated transport;
- Transport electrification;
- Vehicle design and manufacturing;
- Low emission alternative energies for transport;
- Network and traffic management;
- Smart mobility and services;
- Transport infrastructure

The priority area on smart mobility and services is particularly focussing on urban aspects of R&I. Based on these roadmaps, a governance structure will be set up to oversee the implementation of the key actions, monitoring the process and coordinating research programmes and funding on specific thematic areas.

Website – SWD (2017) 223

6. EU Adaptation Strategy (DG CLIMA)

The EU Adaptation Strategy recognises multiple benefits of ecosystem-based approaches to adaptation. The strategy points out that some cities have adopted comprehensive adaptation strategies or specific action plans (e.g. on risk prevention, flood or water management), or are in the process of doing so. City-level adaptation has been addressed in detail in the EEA 2012 report 'Urban adaptation to climate change in Europe' and also more recently in the EEA 2016 report 'Urban adaptation to climate change in Europe 2016 — Transforming cities in a changing climate'.

Seeking EU-wide cooperation and coherence, the Commission supports the exchange of good practice between Member States, regions, cities and other stakeholders. The Commission has published the Risk Management Capability Assessment Guidelines in August 2015. This document provides guidance on the content, methodology, and structure of the Assessments of Risk Management Capability which EU Member States are to submit under the Union Civil Protection Mechanism. The voluntary EU disaster risk management peer review programme allows experts from other countries to examine the set-up and operation of the reviewed country in an area related to risk management. Work is ongoing to increase in these peer reviews the attention given to climate change as a disaster risk.

The European Commission continues to promote urban adaptation strategies through the Covenant of Mayors for Climate and Energy (integrating Mayors Adapt). Adaptation action by cities, in particular, is being developed in coordination with other EU policies.

EU R&I contributes to the Adaptation Strategy related to cities through the exchange of information on R&I projects to feed in Climate-ADAPT (Action 5). EU R&I also contributes to Action 4 of the Adaptation Strategy on bridging the knowledge gaps, through assessment reports and consultations. The knowledge gaps addressed were among other things (i) Better integration of different processes in Earth System Models, (ii) Development of scenarios and models in the key sectors generating GHG emissions (energy, industry, transport, food and Infrastructure), (iii) Improved assessment of climate change impacts and (iv) Development of new methods for damage and adaptation cost-benefit calculation.

The adaptation strategy states that ecosystems and the services they provide are suffering from the adverse impacts of climate change, which is accelerating the decline of biodiversity and reducing their ability to buffer natural extremes. Ecosystem-based approaches to adaptation are usually cost-effective under multiple scenarios. They are easily accessible and provide multiple benefits, such as reduced flood risk, less soil erosion, improved water and air quality and reduced heat island effect.

Website – EU Adaptation Strategy

Website - COM (2013) 216 final

Website – EEA 2016 report 'Urban adaptation to climate change in Europe 2016 — Transforming cities in a changing climate'

Website - EEA 2012 report 'Urban adaptation to climate change in Europe'

Website - EU cities adapt - Adaptation Strategies for European Cities: Final Report (2013)

6.1. Climate-ADAPT

The European Climate Adaptation Platform (Climate-ADAPT) hosted by the EEA, aims to support Europe in adapting to climate change.

EU R&I contributes to the Climate-ADAPT platform related to cities through the Climate Adapt Advisory group with the aim to facilitate the exchange of up-to-date adaptation information, enable the easy uptake of information by end-users and contribute to better cooperation across sectors/levels.

This European Commission initiative helps users to access and share information on: Expected climate change in Europe; Current and future vulnerability of regions and sectors; National and transnational adaptation strategies; Adaptation case studies and potential adaptation options; and Tools that support adaptation planning. Many of the database items come from the research projects funded within Framework Programmes Horizon 2020, FP7, FP6 and FP5.

The Climate-ADAPT platform includes information and guidance on policies, methodologies and good practices, including ecosystem/biodiversity based adaptation strategies.

Website - Climate-ADAPT

6.2. Covenant of Mayors (CoM) (DG ENER + DG CLIMA)

See paragraph on the Covenant of Mayors mentioned on p.26 of this report under 3. Energy Union

7. EU Environmental Policy (DG ENV)

7.1. The 7th Environment Action Programme (EAP)

One of the key objectives of the 7th Environmental Action Programme is to help cities become more sustainable. The EAP states: "Europe is densely populated and 80 % of its citizens are likely to live in or near a city by 2020. Cities often share a common set of problems such as poor air quality, high levels of noise, greenhouse gas emissions, water scarcity, and waste. Addressing these problems means working together. This is why the EAP aims to promote and expand initiatives that support innovation and best practice sharing in cities. The aim is to ensure that by 2020, most cities in the EU are implementing policies for sustainable urban planning and design, and are using the EU funding available for this purpose".

EU R&I has been actively contributing to the 7th Environmental Action Programmes objectives related to cities through delivery of evidence, responding to the demand for indicators and targets for resource efficiency to guide public and private decision-makers. .

Website – 7th Environmental Action Programme

- **The European Environment – State and Outlook 2015**

The European environment — state and outlook 2015 report (SOER 2015) provides a comprehensive assessment of the European environment's state, trends and prospects, and places it in a global context. It informs European environmental policy implementation between 2015 and 2020, and analyses the opportunities to modify existing policies (and the knowledge used to inform those policies) in order to achieve the European Union's 2050 vision of living well within the limits of the planet.

SOER 2015 is based on objective, reliable and comparable environmental information, and draws upon the evidence and knowledge base available to the European Environment Agency (EEA) and the European environment information and observation network (Eionet), a network of 39 European countries.

Website – EEA SOER 2015

- **Urban Atlas and European Topic Centre on Urban, Land and Soil Systems**

EU R&I has been actively contributing to the EEA Urban Atlas which is providing pan-European comparable land use and land cover data for Large Urban Zones with more than 100.000 inhabitants as defined by the Urban Audit. The GIS data can be downloaded together with a map for each urban area covered and a report with the metadata.

Moreover, DG RTD is also providing evidence and data to the European Topic Centre on Urban, Land and Soil systems which is part of the Eionet, supporting the EEA work to monitor urban development in Europe.

A key example of how FP7 projects, namely ARTS, TESS and PATHWAYS, steered knowledge and evidence to the Eionet is represented by the work on "Sustainability transitions: Now for the long term". This report explores what the concepts of sustainability transitions and transformations mean in practice, and the knowledge needed to support systemic change in Europe.

Website – EEA Urban Atlas

Website – European Topic Centre on Urban, Land and Soil Systems

Website – EEA Sustainability Transitions publication

- **Urban Water Agenda 2030**

The Urban Water Agenda 2030 is a joint initiative of the European Commission and local governments, which aims to contribute to the implementation of EU policies and legislation for improving and safeguarding European water resources and to the enhancement of quality of life in European cities by mobilising local authorities for ambitious action towards sustainable urban water management.

While the Urban Water Agenda 2030 initiative has been discussed at several events in 2016 and is being further developed in a consultation process led by ICLEI and EUROCITIES, it will be rolled out to stimulate political commitment and tangible action for sustainable urban water management among local governments and their water utilities across the European Union from 2018 on.

EU R&I contributes to the policy priorities of the Urban Water Agenda through H2020 projects launched in the area of Water in Cities.

Website – Urban Water Agenda 2030

- **European Green Capital and Green Leaf Awards**

The European Green Capital and Green Leaf Awards are awards that aim to provide an incentive for cities to inspire each other and share best practices, while at the same time engaging in friendly competition. In other words, the cities become role models for each other on sustainable urban development.

EU R&I is aligning its initiatives on sustainable urban development, re-naturing cities and nature-based solutions with the actions of the Green Capital and Green Leaf Award.

The Alumni of the Green Capital and Green Leaf Award have launched a Green Capital Network. Cities who are interested in applying to the Green Capital or Green Leaf Awards, or who would like to increase their sustainability can assess their profile with the online Green City Tool.

Website – European Green Capital Award

Website – European Green Leaf Award

Website – Green City Tool

- **LIFE Programme**

The LIFE programme is the EU's funding instrument for the environment and climate action. The general objective of LIFE is to contribute to the implementation, updating and development of EU environmental and climate policy and legislation by co-financing projects with European added value.

H2020 innovation actions on Smart and Sustainable Cities specify the need to build synergies with those projects funded by LIFE with a focus on the urban environment.

Website – LIFE Programme

Website – LIFE in the City publication

7.2. EU Action Plan for the Circular Economy

The EU Action Plan for the Circular Economy establishes actions to "close the loop" of product lifecycles through greater recycling and re-use. Circular economy has been one of the topics of Urban Innovative Actions.

EU R&I contributes to the EU Action Plan for the Circular Economy objectives related to cities through a focus area on Circular Economy in the Horizon 2020 Work Programme 2018-2020. In addition, the Innovation Deals for circular economy launched in 2017 are a new way to address EU regulatory obstacles to innovation in an open and transparent manner.

Website – Circular Economy DG ENV

Website – Innovation Deals for Circular Economy

7.3. EU 2020 Biodiversity Strategy

- **Green Infrastructure Strategy and Mapping and Assessing ecosystems and their services (MAES) - Urban Pilot**

The mapping and assessment of ecosystems and their services in EU - MAES - is an initiative of the European Commission, which aims to improve the knowledge and evidence base for biodiversity policy as defined under Target 2 Action 5 of the EU Biodiversity Strategy to 2020.

The fourth MAES report provides guidance for mapping and assessing urban ecosystems and includes an indicator framework to assess the condition of urban ecosystems and services, which used at European, Member State and local level. This study is an initiative of the working group MAES and was chaired by the JRC and the Dutch National Institute for Public Health and the Environment (RIVM). It has been conducted in close collaboration with the cities of Barcelona, Cascais, Lisbon, Oeiras, Oslo, Padua, Poznań, Rome, Trento, Utrecht, the Portuguese directorate-general for territory, the EEA.

EU R&I contributes to the MAES Urban Pilot through delivery of evidence on biodiversity, ecosystem services and Green Infrastructure and NBS. The main objective is to draw lessons on how to map urban green infrastructure and ecosystem services, with a view to ease their inclusion in policy setting, by pointing out data and indicators that can be used to develop green infrastructure policy in cities. The pilot also aims at providing guidance and examples on how to translate concepts for the enhanced delivery of multiple ecosystem services into concrete action.

EnRoute (Enhancing Resilience of urban ecosystems through green infrastructure) is a project of the European Commission in the framework of the EU Biodiversity Strategy and the Green Infrastructure Strategy building on the MAES Urban Pilot outcomes. EnRoute provides scientific knowledge of how urban ecosystems can support urban planning at different stages of policy and for various spatial scales and how to help policy-making for sustainable cities. It aims to promote the application of urban green infrastructure at local level and delivers guidance on the creation, management and governance of urban green infrastructure. Importantly, it illustrates how collaboration between and across different policy levels can lead to concrete green infrastructure policy setting

Website – MAES Urban Pilot Final Report May 2016

Website - MAES Urban Pilot

Website – Biodiversity Information System for Europe

Website - EnRoute

Website – DG ENV Biodiversity Strategy

7.4. Action Plan for Nature, People & Economy

The Action Plan for Nature, People & Economy, aims to implement the 2020 Habitats and Birds Directive. The European Commission Conclusions on the Fitness Check of the Birds and Habitats Directives confirmed that the Nature Directives are fit for purpose but achievement of their objectives and realisation of their full potential will depend upon substantial improvement in their implementation. In this regard it has been highlighted that the European Committee of Regions (CoR) should become a key enabler in the implementation of Nature directives, with emphasis put on European regions and cities.

Action 12 of the Plan clearly refers to the need to "provide guidance to support the deployment of green infrastructure for better connectivity of Natura 2000 areas; support nature-based solutions projects through EU research and innovation policy and Horizon 2020 funds".

Website – Action Plan for Nature, People & Economy

8. Creative Europe through Cities (DG EAC)

8.1. Creative Europe

The Creative Europe programme (2014-2020) seeks to safeguard and promote cultural and linguistic diversity and to strengthen the competitiveness of the cultural and creative sectors. With a whole budget of 1.46 billion EUR (422 MIL EUR for the Culture Sub-programme) allocated for the period 2014-2020, the programme supports cross-border projects in all fields of culture[4].

The most recent EU R&I orientations on cultural heritage and the upcoming H2020 calls for the work programme 2018-2020 for urban heritage take into consideration the connection between Cultural and Creative Sectors and Urban Spaces. This connection is increasingly recognized[5] and also supported in Creative Europe projects. Currently there are 11 ongoing projects on cities.

Creative Europe also supports the EU Prize for Contemporary Architecture, which rewards and promotes excellence and innovation in European architecture as a contributing factor to sustainable urban development. In addition, there are projects on cultural and creative sectors having urban dimensions, fostering urban economies and social innovation, as for instance in the case of creative hubs or peer-learning exchanges between cities and regions. The European Network of Creative Hubs project and the Trans-Europe-Halles Network "Creative Lenses: Business Models for Culture" (2015-2019) are examples of funded projects.

There is a new action planned under Creative Europe's Cross-sectorial strand in 2018-20 to provide support to cultural and creative spaces, exploring social regeneration through culture for a better use of public spaces. Innovative cities are thus a cornerstone of EU policy-making in different policy areas.

Website – Creative Europe

Website – European Network of Creative Hubs and Creative Lenses: Business Models for Culture

Culture for Cities and Regions funded under the Creative Europe Programme's Cross-sectoral strand is a peer-learning project for cities and regions intended to examine existing cultural initiatives and their impact on local and regional development. The project produced a very interesting catalogue of 71 case studies, 15 thematic study visits and expert coaching for 10 cities/regions.

Website – Culture for Cities and Regions

8.2.European Year of Cultural Heritage 2018 (EYCH)

The European Year of Cultural Heritage aims to raise awareness on the opportunities cultural heritage brings to European societies in terms of intercultural dialogue, social cohesion and economic growth[6]. Several actions are foreseen in 2018, including events and initiatives in cities and regions connected to H2020 projects in the field.

The EU R&I agenda on cities and cultural heritage is strongly in line with the following EYCH objectives: (i) The integration of cultural heritage into environmental, architectural and planning policies; (ii) The promotion of an approach that is people-centred, inclusive, forward-looking, integrated, sustainable and cross-sectorial; and (iii) The recognition of the role of research and innovation for the exchange of knowledge and good practices, including on the innovative use of heritage.

Website – European Year of Cultural Heritage 2018

6 Source: EAC (2017) 'Mapping of Cultural Heritage actions in European Union policies, programmes and activities' p.8

9. European Earth Observation Programme (DG GROW)

9.1. Copernicus Programme

Copernicus is the European system for monitoring the Earth and is coordinated and managed by the European Commission. Copernicus provides valuable services for smart and sustainable cities. For instance, products from the Copernicus Atmosphere Monitoring Service improved by 60% the precision of air quality monitoring systems for pollutants coming from trans-boundary movement, making it easier to measure air quality and to take corrective actions. Data from the Copernicus Sentinel satellites are also extremely useful to optimize the site selection for solar and wind farms and to improve renewable energy forecasting. Finally, Copernicus has several application in the urban monitoring domain, for instance for the monitoring of land cover.

The Copernicus Programme represents a significant part of the space infrastructure and European contribution to the Global Earth Observation System of Systems (GEOSS). EuroGEOSS is the European component of the GEOSS and Copernicus shall act as a major contributor. Work is on-going to ensure policies, activities and plans are aligned between EU R&I and Copernicus.

Website – Copernicus Programme

10. R&I Inter-Institutional Cooperation

10.1 European Parliament

The Urban Intergroup at the European Parliament is a cross-parties and cross-committees grouping with a horizontal approach to discuss urban related issues. Their main objectives are to: monitor the legislative and non-legislative work of EP's committees on urban related issues; work on common EU strategies – to put urban needs on the agenda of EU policies; be actively involved in the preparation of EU legislation; constantly stay in contact with partners and practitioners; and inform about realisation of EU policies on the ground.

Both the Urban Intergroup and the Science and Technology Options Assessment (STOA) were actively involved in the launch of the Strategic Research and Innovation Agenda (SRIA) of the JPI Urban Europe, acknowledging the need for inter- and transdisciplinary research to respond to cities' challenges.

Website – European Parliament Urban Inter-Group

10.2 The Presidency of the Council of the European Union

In the last years, EU R&I has been contributing to the agendas of the following Presidencies on urban matters:

- Hellenic Presidency of the EU – Conference on '*Renaturing Cities: Addressing Environmental Challenges and the Effects of the Economic Crisis through Nature-Based Solutions*' (Brussels, 13-15 May 2014). - Website
- Italian Presidency of the EU – Conference on *'Renaturing Cities: Systemic Urban Governance for Social Cohesion*' (Milan, 1-2 December 2014). - Website
- Dutch Presidency of the EU – Conference on *'Adaptation Futures'* (Rotterdam, 10-13 May 2016) - Website
- Estonian Presidency of the EU – Conference on *'Nature-based Solutions: From Innovation to Common-use'* (Tallinn, 24-26 October, 2017). - Website

10.3 European Committee of the Regions

On 9 July Carlos Moedas, Commissioner for Research and Innovation, and Markku Markkula, President of the European Committee of the Regions confirmed both their support to Cities as actors of Open Innovation. Initiatives such as the European Capital of Innovation and the Knowledge Exchange Platform were pointed out as key initiatives in supporting local authorities in taking up this role.

Website – CoR Press Release 9 July 2017

Supporting knowledge exchange between CoR and DG RTD, on 28 June DG RTD and CoR co-organised the Joint Hearing on Cities as Actors of Open innovation in which the latest policy priorities on R&I for urban development were discussed in three panels:

- Smart & Sustainable Cities - R&I for Accelerating the Transition
- Enhancing Cohesion Policy with Urban Social Innovation
- Regenerative, Circular and Diverse Cities

Website – Joint Hearing on Cities as Actors of Open Innovation – June 2017

EU RESEARCH & INNOVATION OPEN TO THE WORLD: ADDRESSING SUSTAINABLE URBAN DEVELOPMENT AT THE GLOBAL LEVEL

EU's research and innovation is open to the world and supports EU external policies by promoting scientific excellence as well as economic and industrial competitiveness and providing solutions to global societal challenges. The results of EU research and innovation contribute to the development and implementation of important international commitments such as the UN Convention for Climate Change, particularly the COP21 Paris agreement, The Sendai Framework for Disaster Risk Reduction, the Convention on Biological Diversity, the 2030 Agenda for Sustainable Development and the UN Sustainable Development Goals.

1. Habitat III New Urban Agenda: Science, Research and Innovation as Means of Implementation

The New Urban Agenda is an action-oriented document that aims to provide the global principles, policies and standards required to achieve sustainable urban development, to transform the way we construct, manage, operate and live in our cities.

EU R&I contributes to the New Urban Agenda by ensuring that Science, Technology and Innovation (STI) delivers as a *means of implementation* of the Habitat III New Urban Agenda.

EU's transnational research and innovation actions on sustainable urban development represent a key instrument to "reinvigorate" the global commitment towards a systemic New Urban Agenda at the global level. Innovation will be the 'new' of such agenda.

Art. 157 ' We will support science, research, and innovation, including a focus on social, technological, digital and nature-based innovation, robust science-policy interfaces in urban and territorial planning and policy formulation, as well as institutionalized mechanisms for sharing and exchanging information, knowledge and expertise, including the collection, analysis, standardization and dissemination of geographically–based, community-collected, high-quality, timely and reliable data , disaggregated by income, sex, age, race, ethnicity, migration status, disability, geographic location, and other characteristics relevant in national, sub-national, and local contexts.'

Website - New Urban Agenda

2. Science Diplomacy and Innovation in International Agreements

2.1. The 2030 Agenda & SDGs

The 2030 Agenda for Sustainable Development is a plan of action for people, planet and prosperity. It also seeks to strengthen universal peace in larger freedom, through a revitalized Global Partnership for Sustainable Development. The 17 Sustainable Development Goals (SDGs) and 169 targets will stimulate action over the next fifteen years in areas of critical importance for humanity and the planet.

- **New European Consensus on Development (DEVCO)**

The New European Consensus on Development points out that *"The EU and its Member States will seek to boost the potential of cities as hubs for sustainable and inclusive growth and innovation, taking account of their wider rural communities and of balanced regional development. They will promote inclusive sustainable urban development to address urban inequality focusing on those most in need, including those living in informal settlements and slums. They will support partners to improve the delivery of basic services and equitable access to food security, accessible, decent and affordable housing and the quality of life of rapidly growing urban populations. In line with the UN's New Urban Agenda, they will promote sustainable land use planning, equitable management of land markets, sustainable urban mobility and smart, safe cities that make use of opportunities from digitalisation and technologies. They will promote inclusive, balanced, integrated territorial and urban policies, and multilevel governmental coordination, forging stronger links between rural*

and urban areas. They will build cities' resilience to shocks and harness opportunities for a low-emission and climate-resilient economy."

EU R&I contributes to the 2030 Agenda and, more specifically, to SDG 11 'Make cities inclusive, safe, resilient and sustainable' by ensuring that Science, Technology and Innovation (STI) delivers as a *means of implementation* together with finance, trade, and capacity building.

Moreover, in close cooperation with EUROSTAT, DG RTD is contributing to the EU SDG indicator set on cities, as part of the Communication on 'Next steps for a sustainable European future: European action for sustainability'.

Website – Sustainable Development Goal 11

2.2. The COP21 Paris Agreement

The COP 21 Paris Agreement builds upon the UN Convention for Climate Change (1992) and – for the first time – brings all nations into a common cause to undertake ambitious efforts to combat climate change and adapt to its effects, with enhanced support to assist developing countries to do so. As such, it charts a new course in the global climate effort. The Agreement also reinforces the decisions related to local and subnational governments adopted at COP16 in 2010 and COP19 in 2013 for the recognition, engagement and empowerment of local and subnational governments.

The 5th Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) recognized that "Much of key and emerging global climate risks are concentrated in urban areas." City-level action will be critical for achieving the mitigation and adaptation goals of the Paris Agreement. EU-funded research into urban adaptation and city-based disaster risk management, as well as local and regional mitigation policies and their co-benefits have been and will continue providing major contribution to worldwide scientific efforts to support delivery on the international climate commitments and national adaptation and mitigation plans.

The Intergovernmental Panel on Climate Change IPCC Report covers the topic of cities in its Assessment Report (AR6), which is expected to be released in three working group contributions in 2020/2021 and, a special report on cities will be part of the 7th Assessment cycle and will likely be published in 2023.

WGII AR6 will build on the scientific literature and EU R&I results to cover climate-related impacts and risks for cities, in particular related to health, well-being, security, settlements, industry, and infrastructure. Rural-urban linkages will also be considered to provide an integrative view that links the vulnerabilities of rural populations to changes in the coastal and terrestrial biosphere.

Website – UNFCC Paris Agreement

Website – IPCC Intergovernmental Panel on Climate Change

2.3. Sendai Framework for Disaster Risk Reduction (SFDRR)

The Sendai Framework commits countries to substantially reduce disaster risk and losses by 2030. The SFDRR offers an opportunity to advance disaster risk reduction in Europe across multiple internal and external policy areas by making all policies risk-informed. As such, it marks a crucial shift from managing disasters to managing risk and establishes resilience-building as a common denominator with the 2030 Agenda for Sustainable Development.

EU R&I contributes to the Sendai Framework through promoting R&I results on Disaster Risk Reduction with the Disaster Risk Management Knowledge Center initiative and developing the EU policy framework on DRR with the EU Action Plan for the Sendai Framework.

The EU Action Plan on the Sendai Framework for Disaster Risk Reduction (EC 2016) sets out a coherent agenda for enhancing risk prevention, building the resilience of societies and developing risk-proofed investments through different EU policies.

In the SFDRR, four priority areas for action are outlined, relating to: the understanding of disaster risk; the strengthening of disaster risk governance; the investment in DRR for resilience; and the enhancement of disaster preparedness. The EU Action Plan aligns the four key areas, and the

corresponding implementation priorities and activities, with the four priority areas and global targets of the Sendai Framework. Area 2 and 3 are highlighted here as they focus on urban areas:

Key Area 2 - An all-of-society approach in disaster risk management | aligned to Sendai Priority 2 'Strengthening disaster risk governance to manage disaster risks':

- Increase the resilience of cities and urban areas to disaster by strengthening the link between disaster risk management and other relevant policies, such as climate change adaptation and urban planning, also through existing global and European alliances (Global Alliance for Urban Crises, Global Covenant of Mayors for Climate & Energy, Covenant of Mayors for Climate and Energy in the EU, and Smart Cities and Cities of the future).
-

Key Area 3 - Promoting EU risk informed investments | aligned to Sendai Priority 3 'Investing in disaster risk reduction for resilience':

- Improve the understanding of green infrastructure development in cities and urban areas through the development of guidance material.

Website – SWD (2016) Action Plan on the SFDRR 2015-2030

Website – UNISDR - SFDRR

2.4. Convention on Biodiversity (CBD)

The objectives of the Convention on Biodiversity are the conservation of biological diversity, the sustainable use of its components and the fair and equitable sharing of the benefits arising out of the utilization of genetic resources, including by appropriate access to genetic resources and by appropriate transfer of relevant technologies, taking into account all rights over those resources and to technologies, and by appropriate funding. The Subsidiary Body on Scientific, Technical and Technological Advice (SBSTTA) provides the Conference of the Parties (COP) and, as appropriate, its other subsidiary bodies, with timely advice relating to the implementation of the CBD. Both have recurrently addressed urban biodiversity issues and impacts of urban areas on non-urban ecosystems.

EU R&I contributes to the CBD related to cities through contribution to various CBD and SBSTTA recommendations.

The Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES) is a science-policy interface on biodiversity and ecosystem services that aims to build capacity for and strengthen the use of science in policymaking. Urban aspects are addressed under Nature's benefits to people' which refers to all the benefits that humanity — individuals, communities, societies, nations or humanity as a whole — in rural and urban settings — obtains from nature. Ecosystem goods and services — including provisioning, regulating and cultural services [8] — all fall in this category.

EU R&I contributes to the IPBES related to cities through direct contribution to support IPBES secretariat, influence future international research agenda and enhance EU FP visibility in line with 'Open to the World', link IPBES work (e.g. global and regional assessments) and Horizon 2020/FP9 for increased impact, and contribute to several SDGs.

Website – Convention on Biodiversity

Website - IPBES

3. EU R&I International Cooperation Actions

3.1. Belmont Forum and SUGI

Established in 2009, the Belmont Forum is a partnership of funding organizations, international science councils, and regional consortia committed to the advancement of interdisciplinary and transdisciplinary science to remove critical barriers to sustainability.

Scientist and stakeholder support is made possible through Collaborative Research Actions (CRAs), which are the Forum equivalent of a call for proposals. Each proposal submitted to a CRA theme in the Belmont Forum Grants Operations (BFGO) must consist of a project co-developed by natural scientists, social scientists, and stakeholders that hail from at least three countries.

Website – Belmont Forum

- **SUGI**

During the annual meeting of the Belmont Forum on 14 October 2015, member funding agencies agreed to align their research agendas by launching a Collaborative Research Action (CRA) on food, water and energy nexus for sustainable cities.

The Sustainable Urbanisation Global Initiative (SUGI) was then established by the Belmont Forum and the Joint Programming Initiative (JPI) Urban Europe in order to bring together the fragmented research and innovation expertise across the globe to find innovative new solutions to the Food-Water-Energy (FWE) Nexus challenge.

SUGI-FWE Nexus is supported by the European Commission and funded under the Horizon 2020 ERA-NET Co-fund scheme with a top-up budget of 5MIL EUR.

Participating funding agencies are: MINCyT (Argentina); CSIRO (Australia); FFG (Austria); FWO & Innoviris (Belgium); FAPESP (Brazil); MOST (Chinese Taipei); RPF (Cyprus); ANR (France); BMBF (Germany); JST (Japan); VIAA (Latvia); NOW (The Netherlands); RCN (Norway); NCN (Poland); QNRF (Qatar); UEFISCDI (Romania); ARRS (Slovenia); NRF (South Africa);FORMAS & SWEA (Sweden); TUBITAK (Turkey); AHRC, ESRC Innovate UK (United Kingdom); NSF (USA).

The SUGI call was launched in January 2017. After the eligibility check a total of 76 proposals were evaluated by a panel of experts. Subsequently, the Steering Committee took the decision on a total of 40 proposals which will be invited to the second stage (Full Proposal stage). The Full Proposal Expert Panel and Funding Agencies meeting will take place in Berlin on November 21-23 2017. On this stage, the final decision for funding will be taken in order to start with the projects on January 2018-2021.

Website – SUGI-Food-Water-Energy Nexus

- **Future Earth**

Launched in 2015, Future Earth is a major international research platform providing the knowledge and support to accelerate transformations to a sustainable world.

EU R&I contributes to Future Earth 'Urban Knowledge-Action Network' by co-producing and synthesizing cutting-edge, actionable knowledge coming from EU funded R&I projects on sustainable urban development.

Website – Future Earth

3.2. Group on Earth Observations (GEO)

The Group on Earth Observations (GEO) is a global partnership of governments and organisations, among them the European Commission and 27 EU MS, launched in 2005, which is implementing the Global Earth Observation System of Systems (GEOSS), a global infrastructure which aims at meeting the need for timely, quality long-term global Earth observation information as a basis for sound decision-making. EU R&I is co-chair of the Group on Earth Observations.

The GEO Strategic Plan 2016-2025 defines eight Societal Benefit Areas, or domains in which Earth observations are translated into support for decision-making. Relevant for this mapping are the Societal Benefit Area on Sustainable Urban Development and on Sustainable Cities and Communities. The GEO Work Programme for 2016 includes the following activities:

Sustainable Urban Development

- Initiatives: (i) GEO Human planet Initiative: Spatial modelling of impact, exposure and access to resources; (ii) Global observation system for persistent organic pollutants (GOS4POPS); (iii) Global Urban observation and information
- Community actions: (i) African geochemical baselines; (ii) Airnow International: Expanding networks and integrating method for air quality and health data; (iii) Chinese Tsunami mitigation system; (iv) Earth observations for cultural heritage documents; (v) Global flood awareness system (GLoFAS)

Sustainable Cities and Communities

- Initiatives: (i) Earth observations for Ecosystem Accounting (EO4EA); (ii) Earth observation in the service of the 2030 Agenda for Sustainable Development (EO4SDG); (iii) GEO hazard supersites and natural laboratories (GSNL); (iv) GEO human planet initiative: Spatial modelling of impact, exposure and access to resources; (v) Global urban observation and information
- Community activities: (i) Copernicus atmospheric monitoring service (CAMS); (ii) Copernicus Climate Change Service (C3S)

The SMURBS project on Smart Urban solutions focusing on Smart Cities and Resilient Societies is supported with H2020 funding through the ERA-net Cofund ERA-PLANET. The overall goal of ERA-PLANET's Strand 1 is to fully exploit data and information, tools and services that derive from the increasing multi-sensor, multi-temporal and multi-scale capacity and use of EO (in situ and space-borne), in conjunction with other cross cutting observational platforms, towards identifying and facing cities' vulnerabilities, supporting policies to design strategies and procedures to shield citizens and mitigate impacts of urbanization. The achievement of this overarching goal will be based on two discrete, but at the same time interconnected, objectives: create Smart Cities and develop Resilient Societies.

The project uses a 'lighthouse city' approach (pilot cases), i.e. selected smart cities of the European network will set the stage to integrate and unify existing, increasing, but still fragmented EO resources (satellites, in situ networks/sensors, UAVs, models, citizen observatories), into information and decision making tools for individuals and local governments.

Website – Group on Earth Observations

Website – GEOSS

Website – ERA-PLANET

Website – SMURBS project

- **Global Human Settlements Layer**

The Global Human Settlements Layer is an open and free tool for assessing the human presence on the planet. It produces new global spatial information, evidence-based analytics and knowledge describing the human presence on the planet. It operates in an open and free data and methods access policy (open input, open method, open output). It is supported by the Joint Research Centre (JRC) and the DG for Regional Development (DG REGIO) of the European Commission, together with the international partnership GEO Human Planet Initiative.

Website – Global Human Settlements Layer

- **Earth Observation Citizens' Observatories**

EU R&I supports GEO projects on the development of citizen observatories for in situ measurements. They enable citizens to use new ICT tools, such as smartphones, tablets or social media and their collaborative power to collect information about their environment (i.e. monitor atmospheric pollution or noise in cities) and participate in decision-making. This information will be made openly accessible, when appropriate, through the GEOSS.

Website – Citizens' observatories and crowdsourcing

3.3. International Urban Cooperation (IUC) (DG REGIO + FPI)

The European Union has launched a three-year programme (2017-2020) to promote international cooperation on sustainable urban development (the International Urban Cooperation programme, or IUC). A key component of the IUC is the pairing of cities in Europe with counterparts in China, India, Japan, North America and South America in order to share knowledge and solutions on sustainable urban development themes.

In this first phase of a longer-term strategy to foster international city-to-city diplomacy, as part of EU external relations, the IUC will use a multi-stakeholder approach involving key partners, both in the public and private sectors. With a budget of over EUR 20 million, IUC activities explicitly seek to reinforce the realization of UN Habitat III goals as well as the objective of the Paris "COP 21" declaration.

IUC builds on the success of the EU's World Cities project and draws on the European Union experience in city networking under the URBACT programme. The latter will help the city pairs to work together in order to design, implement and manage sustainable urban practices in an integrated and participative way. Accordingly, Local Action Plans will be developed using the multi-stakeholder approach, involving the research community, which will seek to define specific activities and economically viable pilot projects to be implemented in the short term in order to ensure results and to open up market opportunities.

EU R&I actions are incorporated in IUC through the active participation of the JRC. In addition, future exchange between H2020 initiatives and IUC actions can be explored.

Website - IUC

Website – World Cities Project

3.4. EU-CHINA – Sustainable Urbanisation Flagship Initiative

The EU-China Sustainable Urbanisation Flagship Initiative aims on the one hand; to help EU researchers and innovators to develop new solutions together with Chinese partners taking into account the major urbanisation challenges faced by China. On the other hand it aims to help EU companies build win-win partnerships with Chinese players, showcase their solutions and know-how on a large scale in Chinese cities in order to access new markets, and spur the creation of new innovative products and services.

EU R&I contributes to the EU-China Sustainable Urbanisation Flagship Initiative through the following funding opportunities:

- In the Horizon 2020 work programme 2016-2017 eight topics published under different societal challenges encouraged the participation of international – most importantly Chinese – institutions and researchers in the proposals. See overview Report on EU-China Sustainable Urbanisation Flagship Initiative.

- The ERA-NET Cofund proposal 'Smart Cities and Communities ENSCC' coordinated by the Federal Ministry of Transport, Technology and Innovation, Austria (the Coordinator representative of the JPI Urban Europe) contains an additional activity that will provide financial support for R&I liaison activities targeting China. In that regard, the ENSCC partners' network is working towards a future multilateral call on urban development with China.

- The JPI Urban Europe is developing a Strategic Cooperation Programme with China, which aims at 1) bundling expertise of European and Chinese experts in joint R&I projects; 2) supporting knowledge exchange between European and Chinese experts on urban matters; and 3) establishing a continuous dialogue between the JPI and Chinese collaboration partners at strategic level in order to achieve a long-term goal of developing and implementing projects.

The EU-China Sustainable Urbanisation Flagship fits into a larger EU-China cooperation policy. EU-China cooperation on Science, technology and innovation is pursued within the EU-China Science & Technology agreement which exists since 1995. The EU-China Urbanisation Partnership (since 2012) is led by DG ENER and relies on five pillars of which one addresses Research & Innovation. It confirms the importance of innovation and socio-economic aspects in sustainable urbanisation.

More recently, the Partnership has focused on delivering more concrete outcomes, notably by using the opportunities provided by the EU's International Urban Cooperation programme referred to above, with DG REGIO being the lead partner on the EU side.

Website – Report 2013 EU-China Workshop

Website – Report on EU-China Sustainable Urbanisation Flagship Initiative

3.5. EU-CELAC Central and Latin American Countries Cooperation

• EU-CELAC Cooperation on Sustainable Urbanisation

The last EU-CELAC Senior Officials Meeting in Research and Innovation of March 2017 confirmed research cooperation in sustainable urbanisation as a strategic priority of common interest between the two regions (see Joint Communiqué of the 2017 JIRI SOM March 2017 and 2016 Roadmap for International Cooperation with CELAC).

As a result, the European Commission has ensured that support to EU-CELAC cooperation in this field is included in the EU Framework Programme for Research and Innovation – Horizon 2020, and has developed a dedicated research and innovation action specifically targeting the CELAC region (a 2019 CELAC flagship call on NBS for urban ecosystem regeneration).

Successful cooperation with the region under the future Horizon 2020 work programme (2018-2020) should be based on a thorough understanding of the regional capacities and needs and therefore the European Commission would like to establish a structured dialogue process with CELAC countries interested in sustainable urbanisation and ensure the identification of common priorities. Following an EU-CELAC workshop in Lisbon in June 2017, CELAC countries have identified national representatives to attend a ½ day event on Sustainable urbanisation on 3/10 back to back to the EU-CELAC Senior Officials Meeting in San Salvador (2 or 3 October 2017). This event should provide the framework for a possible working group on sustainable urbanisation which would discuss broader issues (such as R&I for the SDGs), define regional interest in the field of NBS and sustainable urbanisation and see how best to match CELAC & EU interests and capacities.

In addition, a 'Non –paper on productivity' has been drafted by the Commission services & EEAS as input for the October EU CELAC Summit. The paper will also be discussed in COLAC (Council Working Party on Latin America and the Caribbean) in September and in case be adopted as an official EU document. It includes R&I input on 'Sustainable and circular urban economy' as well as on 'Knowledge economy based on innovation, education, training and high level skills'.

Since 2011, the European Commission together with the Inter-American Development Bank (IDB) have been supporting networks of cities in Latin America and the EU in a project known as URBELAC ("Urban European and Latin American and Caribbean cities"). URBELAC promotes the exchange of experience and best practice for a more sustainable pattern of development in cities, through benchmarking and the preparation of action plans in participating Latin American cities. In three successive editions, URBELAC has allowed 12 EU cities and 15 Latin-American cities to work closely together on a wide range of urban issues such as management models for specific urban areas, smart and compact city models, management of tourism, public safety in an urban setting, etc.

- **EU-BRAZIL Sector Dialogue on R&I for Sustainable Cities and Nature-based Solutions**

The EU-Brazil sector dialogue on Research & Innovation for sustainable cities and nature-based solutions (NBS) aims to facilitate mutual learning and knowledge sharing in this field.

EU R&I contributed to the 2015-2016 EU-BRAZIL Sector Dialogue through the organisation of an international seminar in Brasilia on 19-20 November 2015 and joint events in Europe in 2016. This was a first opportunity to promote European nature-based solutions worldwide.

A second sector dialogue on this topic is set to start in 2017 in view of deepening mutual learning on NBS, with a bigger emphasis on the Brazilian challenges, priorities and existing best practices. In parallel, dissemination of the NBS concept and of Horizon 2020 calls on NBS will take place, as well as the organisation of a stakeholder taskforce to ensure a better understanding of the NBS concept in the Brazilian context and its implementation across administrative scales.

The EU-Brazil Sector Dialogues Facility, created in 2008, has consolidated the strategic partnership between Brazil and the EU on mutual priority areas, providing technical and financial support in order to promote exchange of knowledge and experiences among the involved partners. Up to now, the Facility has supported the implementation of over 220 projects covering 30 different sector dialogues. Now entering in its fourth phase of implementation and covering the timeframe 2017-2019 with a budget of 3.5 million EUR, the Sector Dialogue Facility is inspired by the new funding instrument, the Partnership Instrument, where the political dimension of the Strategic Partnership has a growing weight as well as EU and mutual interests. The Sector Dialogues Facility is jointly coordinated by the Management Secretariat of the Brazilian Ministry of Planning, Development and Management (MP), the Delegation of the European Union to Brazil (DELBRA) and the Brazilian Ministry of Foreign Affairs (MRE).

Brazil is also eligible to participate in the IUC referred to above for city-to-city cooperation. In addition, as far as South America is concerned, the IUC has a component top promote region-to-region knowledge sharing on regional innovation systems drawing on the experience of the EU Smart Specialization Strategies. The JRC is actively involved in these activities.

Website – EU-Brazil Sector Dialogue Facility (in Portuguese)

3.6. International Cooperation in the field of Urban Mobility

International cooperation in the field of urban mobility was supported through the SOLUTIONS support action (Asia, South America and Africa). It did support cities to develop implementation concepts for integrated sustainable transport measures and finished in October 2016. Within SOLUTIONS, they have worked with 19 cities in Europe, Asia, Africa and Latin America on knowledge sharing and the development of implementation concepts; capacity building for over 2000 experts' factsheets and policy paper were also developed. SOLUTIONS supported the launch of the Action Platform: Urban Electric Mobility Initiative (UEMI) with UN-Habitat at the UN Climate Summit in September 2014 in New York.

The SOLUTIONS and UEMI teams have launched a new series of twinning activities and will provide support to cities in emerging economies as part of the EU funded project FUTURE RADAR (H2020 CSA that started on the 1st January 2017) from the European Green Vehicles Initiative: a new call for cities was launched in February 2017, new learning program will start, pilot project concepts will be developed for selected cities (in the field of electro mobility).

In addition, SOLUTIONS and UEMI did participate actively to recent international conferences like Habitat III on Urban Development in Quito (Ecuador) in October 2016 and the UN Climate Change Conference COP 22 that took place in Marrakech in November 2016.

As a follow up and part of the preparation of H2020 next Calls for WP 2018-2020, a flagship initiative on 'Urban mobility and sustainable electrification in large urban areas in developing and emerging economies' is planned. The main aim is to have twinning of EU and international projects on urban electric mobility in Asia (e.g. China and India), CELAC (e.g. Brazil and Mexico) and Africa.

3.7. EU-USA Twinning programme in R&D in Urban Logistics (DG MOVE)

Since 2014, the European Commission's DG MOVE cooperates with the US Department of Transport's Federal Highways Agency (FHWA) in a twinning programme where 4 Horizon2020 funded urban freight logistics projects (NOVELOG, CITYLABS, SUCCESS and U-Turn) are being twinned with a freight studies programme at the FHWA. The aim is to share information on mutual topics of interest and advance innovative solutions for urban freight. This is achieved by sharing research efforts, exchange visits, the development of a Compendium of Freight Projects and by organising joint events at the TRB (large event in Washington) Roundtable Presentations (2016, 2017, planned 2018).

Website - Projects

3.8. Research in the framework of the European Development Fund (EDF)

Research on urban development in specific contexts has also been supported in the framework of the European Development Fund. This research was a complement to actions developed with an Integrated Neighbourhood approach.

The Programme for the Rehabilitation and Planning of Neighbourhoods (PARAQ) implemented in Haiti (2012-2018) was allocated a total amount of 850.00 EUR. The two research projects had multiple objectives: to enrich the reflection on development, especially urban; contribute to the production of scientific knowledge on the modes of urban and social organizations in the post-earthquake context; and to produce knowledge on the dynamics of the metropolitan area in the medium and long term in order to provide assistance to decision-making for public actors.

Website – PARAQ

4. EU R&I cooperation with International Institutions and Key Players

4.1. The Organisation for Economic Co-Operation and Development (OECD)

- **Green Growth and Sustainable Development Forum (GGSD Forum)**

This Forum addresses "Urban green growth, land use and spatial planning" and examines environment and socio-economic implications of different land use and spatial planning policies. Moreover, it explores how innovative approaches to land-use regulation and environmental policy instruments could complement and impact on traditional land-use planning and current approaches to green growth at the national and sub-national levels.

EU R&I Contributes to the annual meeting of the Forum aimed at providing a dedicated space for multi-disciplinary dialogue on urban green growth.

Website – OECD GGSD Forum

4.2. The Green Growth Knowledge Platform (GGKP)

The Green Growth Knowledge Platform is a global network of international organizations and experts that identifies and addresses major knowledge gaps in green growth theory and practice. By encouraging widespread collaboration and world-class research, the GGKP offers practitioners and policymakers the policy guidance, good practices, tools, and data necessary to support the transition to a green economy.

The GGKP was established in January 2012 by the Global Green Growth Institute, the Organisation for Economic Co-operation and Development, the United Nations Environment Programme and the World Bank.

DG RTD is formally part of the Scientific Committee of the GGKP in charge of organising the Fifth Green Growth Knowledge Platform Annual Conference on Sustainable Infrastructure in cities, to be hosted by the World Bank (Washington, 27-28 November 2017).

Website – Green Growth Knowledge Platform

FACTS & FIGURES ON H2020, FP7, FP6 AND FP5

HORIZON 2020

In the Horizon 2020 framework programme cities are stimulated to be Actors of Open Innovation, which means that city authorities become active participants in R&I projects. This broadens the perspective in comparison to previous framework programmes were cities were mainly the sites and objects of research.

Total H2020 EC Contribution to Urban R&I projects 2014-July 2017: circa € 1.7 Billion

Detail of budgets dedicated to research and innovation projects supporting sustainable urban development:

- H2020 – Excellent Science € 193.9 Million
    - Frontier Research By The European Research Council (ERC) €98.9 Million
    - Marie Curie Actions € 89.3 Million
    - Future And Emerging Technologies €5.6 Million
- H2020 - Industrial Leadership €289.3 Million
    - Leadership In Enabling And Industrial Technologies €215.8 Million
    - Innovation in SMEs €73.5 Million
- H2020 - Societal Challenges €1.2 Billion
    - SC1 Health, Demographic Change And Wellbeing €64.9 Million
    - SC2 Food Security, Sustainable Agriculture And Forestry, Marine And Maritime And Inland Water Research And The Bioeconomy €34.9 Million
    - SC3 Secure, Clean And Efficient Energy €65.8 Million
    - SC4 Smart, Green and Integrated Transport €341.8 Million
    - SC 5 Climate Action, Environment, Resource Efficiency And Raw Materials €269.0 Million
    - SC 6: Europe In A Changing World – Inclusive, Innovative And Reflective Societies €37.1 Million
    - SC 7: Secure Societies – Protecting Freedom And Security Of Europe And Its Citizens €68.8 Million
    - SC Crosscutting Issues €285.6 Million
        - Smart Cities and Communities €214.7 Million
        - Sustainable cities €70.9 Million
- H2020 - Spreading excellence and widening participation €3.5 Million
- H2020 - Fast Track to Innovation Pilot €3.7 Million

See detailed Annex I - H2020

7TH FRAMEWORK PROGRAMME

The Seventh Framework Programme (FP7) deepened the understanding of the urban challenges and has been instrumental in the development of technology as well as pathways and strategies for sustainable urban development in different areas, notably energy efficiency and climate action.

Total FP7 EC Contribution to Urban Research projects 2007-2013: circa € 1.9 Billion

Detail of budgets dedicated to research projects supporting sustainable urban development:

- FP7 – Cooperation circa €1.7 Billion
    - Health circa €13.7 Million
    - Food, agriculture and fisheries, and biotechnology circa €10 Million
    - Information and communication technologies circa €468.7 Million
    - Nano-sciences, nano-technologies, materials and new production technologies circa €49.2 Million
    - Energy circa €299.4 Million
    - Environment (including climate change) circa €330.1 Million
    - Transport (including aeronautics) circa €351.7 Million
    - Socio-economic sciences and the humanities circa €67.8 Million
    - Space circa €26.4 Million
    - Security circa €120.8 Million
- FP7 – Ideas – Frontier Research ERC circa €101.8 Million
- FP7 – People circa €80.2 Million
    - Initial training of researchers - Marie Curie Networks circa €37.5 Million
    - Industry-academia partnerships circa €11.2 Million
    - Intra-European fellowships circa €14.2 Million
    - International dimension - outgoing and incoming fellowships, International cooperation scheme, reintegration grants circa €17.3 Million
- FP7 – Capacities circa €70.5 Million
    - Research for the benefit of SMEs circa €30.4 Million
    - Regions of Knowledge circa €18.1 Million
    - Research Potential circa €3.9 Million
    - Science in Society circa €14.9 Million
    - Support to the coherent development of research policies circa €1.2 Million
    - Specific activities of international cooperation circa €2 Million

Smart Cities Calls: circa €232 Million

See detailed Annex II - FP7

6TH FRAMEWORK PROGRAMME

The Sixth Framework Programme (FP6) introduced funding for smart cities and paved the way for the European Research Area and the ERA-Nets with EU top up funding to joint calls and other coordination activities among national programmes. The Joint Programming Initiative Urban Europe (JPI UE) is the output of such an ERA-NET on urban issues.

Total FP6 EC Contribution to Urban Research projects 2002-2006: circa € 400.3 Million

Detail of budgets dedicated to research projects supporting sustainable urban development:

- FP6 – Thematic Priorities circa €363.0 Million
    - Information Society Technologies circa €79.3 Million
    - Nano-technologies and nano-sciences, knowledge-based multifunctional materials, new production processes and devices circa €10.0 Million
    - Aeronautics and Space circa €16.7 Million
    - Sustainable Development, Global Change and Ecosystems circa €251 Million
    - Citizens and Governance in a knowledge-based society circa €6.0 Million
- FP6 - Strengthening foundations of the ERA circa €24 Million
    - Support for the coordination of activities circa €3 Million
    - Coherent development of research and innovation policies circa €7.5 Million
    - Specific research activities for SMEs circa €2.7 Million
    - Specific measures in support of international cooperation circa €10.8 Million
- FP6 – Structuring the European Research Area circa €13.2 Million
    - Research and innovation circa €0.7 Million
    - Human Resources and Mobility (Marie Curie actions) circa €10.6 Million
    - Science and Society circa €1.9 Million

See detailed Annex III - FP6

5TH FRAMEWORK PROGRAMME

The Fifth Framework Programme (FP5) focused on a problem-solving approach with so-called 'key actions' of which the one on 'The City of Tomorrow and Cultural Heritage' was a first integrated and systemic R&I approach to urban challenges in Framework Programmes.

The *City of Tomorrow and Cultural Heritage* Key Action aimed to improve urban sustainability through delivering real, noticeable benefits to citizens throughout the EU by concentrating resources on the four specific areas of city planning and management, cultural heritage, built environment and urban transport. The Key Action was specifically designed to ensure rapid, EU-wide take-up of practical new approaches to urban governance, planning and management.

Website – FP5 The City of Tomorrow and Cultural Heritage Key Action

Total FP5 EC Contribution to Urban Research projects 1998-2002: circa € 479.0 Million

Detail of budgets dedicated to research projects supporting sustainable urban development:

- FP5 - Quality of Life and management of living resources (Quality of Life) circa €12.2 Million
- FP5 - User-friendly information society (IST) circa €79.8 Million
- FP5 - Competitive and sustainable growth (GROWTH) circa €91.7 Million
- FP5 - Energy, environment and sustainable development (EESD) circa €266.5 Million
- FP5 - Confirming the international role of Community research (INCO 2) circa €18.5 Million
- FP5 - Improving the human research potential and the socio-economic knowledge base (Improving) circa €10.4 Million
- FP5 – EURATOM circa €0.7 Million

See detailed Annex IV - FP5

ANNEX – DETAILED PROJECT OVERVIEW

See Annex for overview on
Projects Supporting Sustainable Urban Development
Funded under Horizon 2020, FP7, FP6 and FP5

EU Research & Innovation for and with Cities
Yearly Mapping Report July 2017

Getting in touch with the EU

IN PERSON
All over the European Union there are hundreds of Europe Direct Information Centres.
You can find the address of the centre nearest you at: http://europa.eu/contact

ON THE PHONE OR BY E-MAIL
Europe Direct is a service that answers your questions about the European Union.
You can contact this service
– by freephone: 00 800 6 7 8 9 10 11 (certain operators may charge for these calls),
– at the following standard number: +32 22999696 or
– by electronic mail via: http://europa.eu/contact

Finding information about the EU

ONLINE
Information about the European Union in all the official languages of the EU is available on the Europa website at: http://europa.eu

EU PUBLICATIONS
You can download or order free and priced EU publications from EU Bookshop at: http://bookshop.europa.eu. Multiple copies of free publications may be obtained by contacting Europe Direct or your local information centre (see http://europa.eu/contact)

EU LAW AND RELATED DOCUMENTS
For access to legal information from the EU, including all EU law since 1951 in all the official language versions, go to EUR-Lex at: http://eur-lex.europa.eu

OPEN DATA FROM THE EU
The EU Open Data Portal (http://data.europa.eu/euodp/en/data) provides access to datasets from the EU. Data can be downloaded and reused for free, both for commercial and non-commercial purposes.

This report provides an overview of the main EU Research and Innovation (R&I) actions for and with cities, promoted both at the European and international level to foster sustainable urban development. In addition it presents a detailed overview of budget of Horizon 2020 and the past three research Framework Programmes (FP7, FP6 and FP5) committed to city-related projects.

The added value of this publication is to provide a comprehensive overview of actions and initiatives which have been promoted by the EU R&I and present the contribution to other EU policies on sustainable urban development. This document is a first attempt to provide a more systemic overview of all the different EU R&I action on smart and sustainable cities. The intention is to update this report on a yearly basis and create a series.
